Linguistics, 1969 *Historical Linguistics and Endangered Languages* Patience Epps, Danny Law, Na'ama Pat-El, 2021-07-28 This collection showcases the contributions of the study of endangered and understudied languages to historical linguistic analysis and the broader relevance of diachronic approaches toward developing better informed approaches to language documentation and description The volume brings together perspectives from both established and up and coming scholars and represents a globally and linguistically diverse range of languages The collected papers demonstrate the ways in which endangered languages can challenge existing models of language change based on more commonly studied languages and can generate innovative insights into linguistic phenomena such as pathways of grammaticalization forms and dynamics of contact driven change and the diachronic relationship between lexical and grammatical categories In so doing the book highlights the idea that processes and outcomes of language change long held to be universally relevant may be more sensitive to cultural and typological variability than previously assumed Taken as a whole this collection brings together perspectives from language documentation and historical linguistics to point the way forward for richer understandings of both language change and documentary descriptive approaches making this key reading for scholars in these fields **The Oxford English Dictionary**, 1989 *English Linguistics, 1500-1800*, 1791

seeking furthering the possibilities of both the page and the canvas of the poet's body Sentence Generation Yuko Sakai, 2017-04-27 Many define the language in various phrases with various modifiers as a tool of communication. However, not all the language is communicated and the language is generated before the communication. We have no words to communicate without thinking whose concrete act is to choose the words. Therefore, cognition and language have the same origin. We, the human beings, have language to recognize and dominate the world including our own mind. This is the reason why we have reason and language. Language is not merely a tool of communication but it is indispensable to have reason and to be a Homo sapiens. The reason is based on the outside world composed of space-time. We perceive the outside world and recognize it by naming or classifying in our each vocabulary. Accordingly, a linguistic theory which explains how and why the sentences are should start with the cognition. The method is opposite to that of Aristotle's tradition which begins in the form and the contents are interpreted from the form based on the view that language is a tool of communication regarding only the communicated words as language. The same view is also found in F. de Saussure who regarded language as a given and socially approved system of signs. Language is not a system of signs but what we generate just in the next moment. If we shut up language does not exist. The system or grammar may change with our usage of words moment by moment, thus language continues to change as long as it is spoken. Consequently, this work finds the DEEP and UNIVERSAL STRUCTURE of sentence in the structure of the four-dimensional cognition. First, we deduce what structure is necessary to express the four-dimensional cognition. Secondly, we see how we generate the surface structures in five languages: English, Spanish, Chinese, Japanese, and Ainu. We define each word in syntactic tree diagrams just like chemical formulas to verify the deep structure in the surface structure.

A Supplement to the Oxford English Dictionary R. W. Burchfield, 1972 These volumes replace the 1933 Supplement to the OED. The vocabulary treated is that which came into use during the publication of the successive sections of the main Dictionary that is between 1884 when the first fascicle of the letter A was published and 1928 when the final section of the Dictionary appeared together with accessions to the English language in Britain and abroad from 1928 to the present day. Nearly all the material in the 1933 Supplement has been retained here though in revised form. Preface
