The Burning Question Mike Berners-Lee, Duncan Clark, 2013-09-21 *The Burning Question* reveals climate change to be the most fascinating scientific, political, and social puzzle in history. It shows that carbon emissions are still accelerating upwards, following an exponential curve that goes back centuries. One reason is that saving energy is like squeezing a balloon: reductions in one place lead to increases elsewhere. Another reason is that clean energy sources don't in themselves slow the rate of fossil fuel extraction. Tackling global warming will mean persuading the world to abandon oil, coal, and gas reserves worth many trillions of dollars at least until we have the means to put carbon back in the ground. The burning question is whether that can be done. What mix of politics, psychology, economics, and technology might be required? Are the energy companies massively overvalued, and how will carbon cuts affect the global economy? Will we wake up to the threat in time? And who can do what to make it all happen? Published in Partnership with the David Suzuki Institute

Low Attainers in Primary Mathematics Jenny Houssart, 2013-04-15 In this fascinating book, Jenny Houssart draws on close observations with children in lower mathematics sets in primary schools to investigate why some children opt out of mathematics at an early age. After introducing us to the children, she addresses a particular type of mathematical task in each chapter, including mental work, practical work, written work, calculators, and computers. Assessment tasks. Through the use of stories and quotes, the author shows how the children respond to specific tasks and presents evidence of a range of difficulties that emerge as the children are working. Each chapter ends with discussions and implications for classroom practice. *Low Attainers in*
