Richard J. Samuels, 2018-08-06 Since World War II Japan has become not only a model producer of high tech consumer goods but also despite minimal spending on defense a leader in innovative technology with both military and civilian uses In the

United States nearly one in every three scientists and engineers was engaged in defense related research and development

at the end of the Cold War but the relative strength of the American economy has declined in recent years What is the relationship between what has happened in the two countries And where did Japan s technological excellence come from In

an economic history that will arouse controversy on both sides of the Pacific Richard J Samuels finds a key to Japan s success

in an ideology of technological development that advances national interests From 1868 until 1945 the Japanese economy

was fired by the development of technology to enhance national security the rallying cry Rich Nation Strong Army

accompanied the expanded military spending and aggressive foreign policy that led to the disasters of the War in the Pacific

Postwar economic planners reversed the assumptions that had driven Japan s industrialization Samuels shows promoting

instead the development of commercial technology and infrastructure By valuing process improvements as much as product

innovation the modern Japanese system has built up the national capacity to innovate while ensuring that technological

advances have been diffused broadly through industries such as aerospace that have both civilian and military applications

Struggling with the uncertainties of a post Cold War economy the United States has important lessons to learn from the way

Japan has subordinated defense production yet emerged as one of the most technologically sophisticated nations in the world

The Japanese like the Venetians and the Dutch before them show us that butter is just as likely as guns to make a nation

strong but that nations cannot hope to be strong without an ideology of technological development that nourishes the entire

national economy *Digest of Japanese Industry & Technology* ,1994 Japan Transportation ,1988 **Japanese**
