International Handbook of War, Torture, and Terrorism Kathleen Malley-Morrison, Sherri McCarthy, Denise Hines, 2012-12-15 Armed conflict on domestic or foreign soil impacts people's daily lives and shapes policy around the world. Millions live with the threat of terrorism whether from random sources or known enemies. And the acceptability of torture is debated by politicians and public alike. The *International Handbook of War, Torture, and Terrorism* synthesizes historical backgrounds, current trends, and findings from the Personal and Institutional Rights to Aggression and Peace Survey (PAIRTAPS) administered in forty countries over nine global regions. Contributors examine the social, cognitive, and emotional roots of people's thinking on war and national security issues, particularly concerning the role of governments in declaring war, invading other countries, or torturing prisoners. By focusing on the cultural traditions and colonial histories of broad regions rather than of individual nations, the book demonstrates how context shapes ordinary citizens' views on what is justifiable during times of war, as well as more nebulous concepts of patriotism and security. The Handbook introduces the PAIRTAPS and explains the methodology for analyzing responses. It defines war-related concepts from the unique perspectives of Western Europe, U.K., U.S., Middle East, Gulf States, Russia, Balkans, Africa, Latin America, South/Southeast Asia, and East Asia. It provides an integrative summary of definitions and points of view, situates results in terms of social engagement, disengagement, theory, considers implications for peace and reconciliation, and serves as a reflection of the changing global landscape. The *International Handbook of War, Torture, and Terrorism* deserves to be read by a wide range of researchers in peace, psychology, political science, sociology, and anthropology.

Employee and Labor Relations Manual United States Postal Service, 2002 **Greek and Roman Military Manuals** James T. Chlup, Conor Whately, 2020-09-07 This volume explores the enigmatic primary source known as the ancient military manual. In particular, the volume explores the extent to which these diverse texts constitute a genre, sometimes unsatisfactorily classified as technical literature, and the degree to which they reflect the practice of warfare. With contributions from a diverse group of scholars, the chapters examine military manuals from early Archaic Greece to the Byzantine period, covering a wide range of topics including readership, siege warfare, mercenaries, defeat, textual history, and religion. Coverage includes most of the major contemporary siege manual writers, including Xenophon, Frontinus, Vegetius, and Maurice. Close examination of these texts serves to reveal the complex ways in which ancient Greeks, Romans, and Byzantines sought to understand better and impose order upon the seemingly irrational phenomenon known as war. Providing insight into the multifaceted collection of texts that constituted military manuals, this volume is a key resource for students and scholars of warfare and military literature in the classical and Byzantine periods.
