education and related areas 香港教育大學 Hong Kong,2012-02-28 **English Language Education and Assessment** David Coniam,2014-07-06 This volume gathers contributions in the closely linked fields of English language assessment and language education The contributors from China and Hong Kong represent a mixture of established and new scholars Areas covered in the language education section range across major developments in the redefining of Hong Kong's secondary and tertiary curricula as well as the huge field of China's vocational education curriculum Regarding assessment the contributions reflect major changes in the marking of examinations in Hong Kong whereby all examinations from 2012 onwards are marked onscreen to quality control issues in the administration of China's College English Test which is taken by over 10 million candidates every year Strengthening Upper Secondary Education in Lithuania OECD,2023-11-17 This report explores how Lithuania and its young people can achieve higher returns on its investment in upper secondary education and provides Lithuania with policy recommendations to help improve it by strengthening vocational education pathways and by consolidating upper secondary certification **Individual Differences in Second/Foreign Language Speech Production: Multidisciplinary Approaches and New Sounds** Peijian Paul Sun,Boping Yuan,Xun Yan,Jimin Kahng,2023-09-01 Second foreign language L2 speech production is a complex process requiring individuals combined efforts to utilize various processing components such as conceptualiser formulator and articulator Since the publication of Pim Levelt's book *Speaking From Intention to Articulation* in 1989 a considerable number of studies have examined L2 speech production in the field of neuroscience with a particular focus on the link between speech perception and speech production Undeniably a neurolinguistic examination of speech production can enrich our understanding of how human brains compute linguistic information at a cognitive level However it is insufficient by only focusing on the neurocognitive dimension of speech production given that individuals speech production can be subject to various individual differences factors either cognitively affectively or socio culturally It is therefore necessary to move beyond the neurocognitive understanding of speech production by taking every possible perspective into consideration Individual difference as an umbrella term covers psychological traits personal characteristics cognitive and emotional components that distinguish learners from each other Given that individual difference factors can reveal disparities in L2 learning and performance among learners such factors have attracted researchers growing interest concerning their influences on L2 speech processing their relationships with L2 speech performance and their contributions to L2 speech development Nevertheless our understanding of L2 speech production is not only insufficient compared to other L2 skills such as writing and reading but also limited to the neurocognitive account of L2 speech production More research therefore is in urgent need to uncover the influence of various individual differences factors on L2 speech production from multidisciplinary perspectives **Critical Pedagogy in Hong Kong** Carlos Soto,2019-09-06 This book chronicles the author's application of critical pedagogy in Hong Kong secondary schools serving students from working class families of South Asian heritage so called

ethnic minorities in the local context Soto used concepts such as banking pedagogy generative themes liberatory dialogue and transformative resistance to first understand students school online and community experiences and then to reshape his teaching of English and humanities subjects to address the students academic social and emotional needs This critical ethnography is set against educational reforms in Hong Kong which re orientated schools towards developing a knowledge economy workforce increased privatization and competition in the school system aimed to build national identification with China and sought to address growing inequality in a territory known for wealth disparity While these reforms opened opportunities for implementing student centered pedagogies in schools and increased student access to tertiary education ethnic minority youth faced ongoing economic and social marginalization on top of academic difficulties The central narrative captures everyday struggles and contradictions arising from intersections of neoliberal reforms institutional school histories students transnational realities and collective efforts for equity and social justice In the course of the book a parallel story unfolds as the author explores what it means to be a critical teacher and researcher and is reborn in the process The book s on the ground story is hopeful yet tempered in discussing the limits and possibilities for critical pedagogy It will be of a great resource for researchers teacher educators and pre service and in service teachers who are interested in the topic
