With the ninth edition of the four yearly review of mathematics education research in Australasia the Mathematics Education Research Group of Australasia MERGA discusses the Australasian research in mathematics education in the four years from 2012 2015 This review aims to critically promote quality research and focus on the building of research capacity in Australasia      **Mathematical Competencies in the Digital Era** Uffe Thomas Jankvist,Eirini Geraniou,2023-02-20 This book focuses on the potential interplay between two distinct yet related paradigm shifts in mathematics education drawing

on the notion of networking of theories through illustrative case studies from the Danish educational system and beyond The first paradigm shift is the massive introduction of digital technology in the teaching and learning of the subject the second is a shift from the traditional focusing on mastering of skills and knowledge to being concerned with the possession and development of mathematical competencies This book builds on the Danish KOM Competencies and the Learning of Mathematics project which sources its description of mathematical mastery primarily on the notion of a mathematical competency rather than on lists of topics concepts and results This allows for an overarching framework which captures the perspectives of mathematics teaching and learning at whichever educational level While the KOM framework does not in detail address the role of digital technologies in relation to its description of different types of mathematical competencies etc the chapters of this book set out to do exactly this while in the process also drawing on a selection of other theoretical constructs and frameworks from mathematics education research Starting with introductory chapters by key researchers in the area the book brings forth chapters for each of the KOM framework s eight mathematical competencies authored by Nordic researchers in combination with international scholars The KOM framework also operates with three types of overview and judgement which are specifically addressed in relation to the role of digital technologies in the third part of the book The fourth and final part of the book broadens the scene and provides chapters of a more perspective nature in relation to mathematical competencies in the digital era The book s preface is by Susanne Prediger

**What Can PISA 2012 Data Tell Us?** Lei Mee Thien,NORDIN ABD RAZAK,John Keeves,I GUSTI NGURAH DARMAWAN,2016-03-22 This is the first book regarding the issues of PISA that has been published with respect to the Southeast Asian region It is hoped that the content of this book can benefit and provide greater understanding for readers of several important aspects a country performance in PISA 2012 for each participating Southeast Asian country b the need for international comparative studies from the perspective at all levels of the teaching and learning process c equity and quality of education d how PISA impacts on policy making and e the initiatives and future directions and challenges to improve PISA performance in the future cycles of the PISA Studies The major issues raised in this book warrant investigation and reporting to all countries of the World including not only those countries that were engaged in PISA 2012 but also to the approximately 200 countries that are currently in the United Nations Organisation In these regards the readership of this book could be extended to the educators officers from the ministries of education researchers policy makers practising teachers lecturers in universities and teacher training institutions postgraduate students as well as both primary and secondary school principals and teachers
