Components of the Language-Ready Brain Cedric Boeckx, Antonio Benítez-Burraco, 2016-09-09 This volume highlights new avenues of research in the language sciences and particularly in the neurobiology of language The term language ready brain stresses on the one hand the importance of a brain based description of our species linguistic capacity and on the other the need to appreciate the crucial role culture plays in shaping the linguistic systems children acquire and adults use For this reason the focus is not put on language per se but on our learning biases and cognitive pre dispositions toward language Both brain and culture are considered at two crucial levels of inquiry phylogeny and ontogeny In a fast growing field like the language sciences and specifically language evolution studies this book has tried to capture several of the most exciting topics explored currently sowing seeds for future investigations

Transforming Information Literacy Instruction Amy R. Hofer, Silvia Lin Hanick, Lori Townsend, 2018-11-16 Provides information literacy practitioners with a thorough exploration of how threshold concepts can be applied to information literacy identifying important elements and connections between each concept and relating theory to practical methods that can transform how librarians teach A model that emerged from the Enhancing Teaching Learning Environments project in Great Britain threshold concepts are those transformative core ideas and processes in a given discipline that define the ways of thinking and practicing shared by experts Once a learner grasps a threshold concept new pathways to understanding and learning are opened up The authors of this book provide readers with both a substantial

introduction to and a working knowledge of this emerging theory and then describe how it can be adapted for local information literacy instruction contexts Five threshold concepts are presented and covered in depth within the context of how they relate and connect to each other The chapters offer an in depth explanation of the threshold concepts model and identify how it relates to various disciplines and our own discipline information science and to the understandings we want our students to acquire This text will benefit readers in these primary audiences academic librarians involved with information literacy efforts at their institutions faculty teaching in higher education upper level college administrators involved in academic accreditation and high school librarians working with college bound students

Assessment Capacity Christopher DeLuca, Sandra Johnson, 2019-12-13 Given the academic benefits of assessment driven teaching and the growing accountability context of educational systems around the world there is a rapidly developing need to educate teachers in effectively using assessments to promote monitor and report on student learning However assessment has historically been a neglected area in teacher education programmes and empirical research has consistently shown assessment as an area of challenge for many teachers While there is an increased focus across teacher education and professional literature on enhancing the assessment capacity of educators there remains little empirical research on innovative and data based strategies to effectively achieve this goal The purpose of this text is to consolidate existing research on assessment education and to provoke innovative and effective approaches to educating teachers and teachers in training about assessment Given the dearth of relevant research this text also considers the matter of retention and extension of initial assessment learning into teaching careers Combined the articles in this text provide a foundation for novel thinking about developing teachers assessment capacity from pre service to in service contexts This book was originally published as a special issue of Assessment in Education
