09/02/2022 8am	Saw Amy today for an initial consultation regarding her obsessive thoughts and compulsions to clean. Focussed on goal setting and building a history of her present condition. Will see her next week.	
09/02/2022 8am	Amy has had five "cleaning episodes" since our last appointment. She reports these are the most time consuming of her symptoms which she wants to focus on reducing. Amy reports these occur when she is anxious and she feels she has no control over them. We made a plan for her to reach out for help to her safe contact person when she feels one of these episodes coming on.	
09/16/2022 9am	Amy reports an increase in the "cleaning episodes" since our last appointment, reports she had trouble sticking to our plan as her "safe person" was busy and she didn't want to bother them. We have made a plan for her to redirect herself with tasks she enjoys instead.	
09/23/2022 8am	Amy's cleaning episodes have reduced to three since our last appointment. Amy appears brighter and more excited about her future, talking for the first time about moving into a shared house with flatmates once she has her condition under control.	
09/30/2022 9am	Amy reports just two "smaller" cleaning episodes restricted to just her bedroom and not the whole house, since our last appointment. This demonstrates great progress, and she attributes most of this success to practicing her self-redirection and grounding techniques.

Kolodner, 2012-12-06 This book has been a long time in the making The computerization activities described in these pages began in 1977 at the Department of Veterans Affairs VA but we devoted most of our focus and efforts to building and then implementing the extensive hospital information system known as the Decentralized Hospital Computer System DHCP throughout VA Delivering the product has been our primary goal We spent relatively little time documenting or describing our experiences or lessons learned Except for some presentations at national meetings and a relatively few publications almost none of which were in the standard trade journals read by Chief Information Officers CIOs and equivalent top managers in the private and nonprofit sectors VA's accomplishments remained a well kept secret In 1988 Helly Orthner encouraged VA staff to consider writing a book but the press of day to day activities always seemed to take precedence and the book languished on the back burner **Progress Notes** Abraham M. Nussbaum, 2024-06-25 A groundbreaking approach to training doctors could transform the future of health care For decades physicians have been trained on the textbook of the body from the corpse in a cadaver lab to the patient in a procedure suite This type of training usually leads them to specialize

in specific organs or systems and breeds an increasingly impersonal view of medicine in which the importance of person to person care the hallmark of a good relationship between doctors and patients has been lost In this engrossing narrative you ll meet seven extraordinary students who embarked on a new way to train doctors that attempts to regain what s been lost These medical students follow patients instead of physicians accompanying patients to primary care appointments emergency room visits and even surgical procedures developing deep connections and understanding the intricate interplay between the health of our bodies and the health of our communities They learn the textbook of a community in addition to the textbook of the body Through poignant stories of these seven students and the people they meet as patients Dr Abraham M Nussbaum illustrates the power of becoming a doctor and the possibility of changing the way we train doctors As the students acquire a wealth of knowledge about the human body they also navigate immense challenges and responsibilities Throughout the year they go about their lives find love and start families all while getting to know their patients and their lives Progress Notes follows the evolution of medical education and is a must read for premedical students medical students and medical professionals seeking insight into the changing landscape of their field as well as for readers captivated by medical dramas and the pursuit of transformative care that benefits us all
