Abstract

A hospital is often seen dense with population from all walks of life; it is a dwelling place of healthy and ill persons. This study explored the immunization status, safety hospital practices and compliance to standard precautionary measures of BSN Students in University of Mindanao, Davao City, during academic year 2007-2008. A total of 159 respondents were selected through universal sampling and in the end, the following results was sought:

Of the fourteen (14) clinical wards, health care services were provided more by the respondents in Obstetrics, Gynecology and Pay. The most attended clinical wards include; the Operating room, Pediatric ward, General ward, Pay ward, and the Delivery Room. Respondents immunization status is very low in HA, TT₃, TT₄, and TT₅; Low in DPT, OPV, D1, TT₂ and HB₃ dosages. In BCG, immunization is moderate; high in TT₁ dosage; and very high in HB₁ as well as HB₂. Very few students were completely immunized. The overall hospital safety practices are extensive while the level of compliance to general standard precautionary measures against occupational diseases is very high. However, if based on the types of disease transmission, the result is low for direct transmission, very high for airborne transmission and high for vehicular transmission. The review, modification and strengthening of University policies in relation to clinical instruction among BSN Students should be carried out by the institution.

Essentials of Scientific Writing Joseph Mugah, 2016-12-13 Essentials of Scientific Writing How to Write Effective Titles and Abstracts for Research Papers and Proposals is a belated entrant into a vast and crucially important area with scarce reference materials This scarcity manifested itself as I searched what I had expected would be useful source materials for the present book I skimmed through many textbooks on scientific writing and editing articles on the Internet and notes from courses on scientific writing They all turned out to be manifestly wanting in both depth and scope None extended beyond two pages and most were hardly a page long so they were largely useless for my purposes To the authors knowledge few published books treat the subjects of Titles and Abstracts in the kind of detail presented in this book Accordingly in

developing the book the author hoped to fill a void in the crucial area of facilitating sharing of knowledge and information from research work. It is my hope that everyone writing scientific work will endeavor to find space for the book on their shelves and will place it within arms length whenever they are writing or editing the title or abstract. *A Practical Guide to Scientific Writing in Chemistry* Andrew Terhemmen Tyowua, 2023-03-31 Successful completion of postgraduate studies especially PhD and career advancement in academia strongly depend on the ability to publish scientific papers or books and attract research grants. However many chemical scientists find preparing scientific papers and research grant and book proposals difficult partly because of insufficient training in writing and partly because there are few practical books to enable them to learn the art. This step by step practical guide is intended mainly for postgraduate students and early career researchers in chemical science and the libraries that serve them but will also be useful to other scientists.

Key Features

- Improves the reader's chances of getting their manuscript published in chemistry journals
- Increases the likelihood of winning research grants in chemistry
- Takes a lead by the hand approach
- Contains chapters on the preparation of graphical abstracts and research highlights
- Uses sketches and other illustration styles to aid mental visualization of concepts
- Contains practical examples taken from published papers and successful research grant proposals

Understanding and Evaluating Research Sue L. T. McGregor, 2017-10-25 Understanding and Evaluating Research A Critical Guide shows students how to be critical consumers of research and to appreciate the power of methodology as it shapes the research question, the use of theory in the study, the methods used and how the outcomes are reported. The book starts with what it means to be a critical and uncritical reader of research followed by a detailed chapter on methodology and then proceeds to a discussion of each component of a research article as it is informed by the methodology. The book encourages readers to select an article from their discipline, learning along the way how to assess each component of the article and come to a judgment of its rigor or quality as a scholarly report.
