New Perspectives on Narrative and Multimodality Ruth Page,2009-09-10 This study investigates the richly diverse but integrated semiotic potential of storytelling Unlike other interdisciplinary approaches to narrative studies which have privileged the study of words in storytelling this unique collection provides a much needed analysis of how narrative operates using combinations of visual typographic aural gestural and haptic resources Although both multimodal theory and narrative studies have been

invigorated by a variety of theoretical approaches this volume seeks to avoid a single dominant paradigm. Instead the contributors use literary criticism, linguistics, and new media frameworks in a series of critical studies that are directly engaged with a range of multimodal stories. The contributors analyze works that include oral accounts of personal experience, opera, cartoons, print literature, and new media forms of storytelling such as experimental digital fiction and fanfiction.

Engaging Readers Dana A. Robertson, Evelyn Ford-Connors, Susan Dougherty, 2017-03-17 An important goal of teachers is to get all students especially those in the upper elementary and middle grades who struggle with academic work engaged in reading. This book examines current research on instructional principles and actions related to engaged reading. It shows how teachers can translate this research into evidence-based actions that promote productive instructional contexts and focus students' purposeful use of literacy in acquiring knowledge. The authors integrate descriptions of principles and actions with concrete examples of classroom instruction and thematic teaching across disciplinary contexts and demonstrate how teachers might mediate students' reading of complex texts. The book provides readers with a vivid picture of the complexities of teaching reading in the upper elementary and middle grades. In particular, the book blends individual principles and practices into a holistic approach to creating productive and engaged learning environments for all upper elementary and middle grade learners.

Text Complexity Douglas Fisher, Nancy Frey, Diane Lapp, 2016-01-28 There is a big difference between assigning complex texts and teaching complex texts. Doug Fisher, Nancy Frey, and Diane Lapp. And that's the crux isn't it? That's why in this brand new edition of the bestselling *Text Complexity*, the renowned author team provides four new chapters that lay open the instructional routines that take students to new places as readers. No matter what discipline you teach, you will learn how to craft purposeful instruction pitched to your readers' comprehension capacities, your curriculum's themes, and your own assessments on what students need next. Doug, Nancy, and Diane provide how-to's for measuring word and sentence length and other countable features of any written work while giving ample consideration to the readers in your room and how their background knowledge, experiences, and motivations come into play. A rubric for analyzing literary texts for plot, structure, point of view, imagery, clarity, and more, and a complexity scale for analyzing informational texts that describe, inform, and explain. Classroom scenarios of teachers and students engaging with fiction and nonfiction texts that provide enough of a stretch so you'll know the difference between a healthy struggle and frustration. The authors' latest thinking on routines that invite students to interact with complex texts and with one another, including teacher modeling, close reading, scaffolded small group reading, and independent reading. It's time to see text complexity as a dynamic, powerful tool for sliding the right text in front of our students at just the right time. Think of this second edition as *Text Complexity 2.0*. Go, because it's all about the movement of minds at work, going deeper than anyone ever thought possible.
