institutions      **Advances in Crowdsourcing** Fernando J. Garrigos-Simon, Ignacio Gil-Pechuán, Sofia Estelles-Miguel, 2015-05-08 This book attempts to link some of the recent advances in crowdsourcing with advances in innovation and management. It contributes to the literature in several ways. First, it provides a global definition, insights, and examples of this managerial perspective, resulting in a theoretical framework. Second, it explores the relationship between crowdsourcing and technological innovation, the development of social networks, and new behaviors of Internet users. Third, it explores different crowdsourcing applications in various sectors such as medicine, tourism, information, and communication technology, ICT, and marketing. Fourth, it observes the ways in which crowdsourcing can improve production, finance, management, and overall managerial performance. Crowdsourcing, also known as massive outsourcing or voluntary outsourcing, is the act of taking a job or a specific task usually performed by an employee of a company or contractors and outsourcing it to a large group of people or a community crowd or mass via the Internet through an open call. The term was coined by Jeff Howe in a 2006 issue of *Wired* magazine. It is being developed in different sciences, i.e., medicine, engineering, ICT, management, and is used in the most successful companies of the modern era, i.e., Apple, Facebook, Inditex, Starbucks. The developments in crowdsourcing have theoretical and practical implications which will be explored in this book. Including contributions from international academics, scholars, and professionals within the field, this book provides a global multidimensional perspective on crowdsourcing.

**Hayek: A Collaborative Biography** Robert Leeson, 2018-09-15 Hayek claimed that he always made it his rule not to be concerned with current politics but to try to operate on public opinion. However, evidence suggests that he was a party political operative with free market scholarship being the vehicle through which he sought and achieved party political influence. The main purpose of his Mont Pelerin Society had been wholly achieved. Mises promoted Fascists including Ludendorff and Hitler, and Hayekians promoted the Operation Condor military dictatorships and continue to maintain a united front with neo Nazis. Hayek, who supported Pinochet's torture-based regime and played a promotional role in Dirty War Argentina, is presented as a saintly figure. These chapters place free market promotion in the context of the post-1965 neo-Fascist Strategy of Tension and examine Hayek's role in the promotion of deflation that facilitated Hitler's rise to power, his proposal to relocate Gibraltarians across the frontier into Fascist Spain, the Austrian revival of the 1970s, the role of what was presented as neutral academic data on behalf of the International Right, and their efforts to promote Franz Josef Strauss and Ronald Reagan and defend apartheid and the Shah of Iran.

**Economics, Social Sciences and Information Management** Ford Lumban Gaol, Fonny Hutagalung, 2015-12-29 The 2015 International Congress on Economics, Social Sciences, and Information Management (ICESSIM 2015) held 28-29 March 2015 in Bali, Indonesia, aimed to provide a platform for the sharing of valuable knowledge and experience in the context of changing economics and social settings. Information technology has changed many aspects in our life.

Unfolding Cluster Evolution Fiorenza Belussi, Jose Luis Hervás-Oliver, 2016-08-05 Various theories have been put forward as to why business and industry develops in clusters and despite good work being carried out on path dependence and dynamics this is still very much an emerging topic in the social sciences To date no overarching theoretical framework has been developed to show how clusters evolve Unfolding Cluster Evolution aims to address this gap by presenting theoretical and empirical research on the geography of innovation This contributed volume seeks to shed light on the understanding of clusters and its dynamic evolution The book provides evidence to suggest that traditional perspectives from evolutionary economic geography need to be wedded to management thinking in order to reach this point Bringing together thinking from a range of disciplines and countries across Europe this book explores a wide range of topics from the capability approach to network dynamics to multinational corporations to firm entry and exit and social capital This book will be of interest to policy makers and students of urban studies economic geography and planning and development **Field Experiments in**

**Political Science and Public Policy** Peter John, 2017-01-06 Field experiments randomized controlled trials have become ever more popular in political science as well as in other disciplines such as economics social policy and development Policy makers have also increasingly used randomization to evaluate public policies designing trials of tax reminders welfare policies and international aid programs to name just a few of the interventions tested in this way Field experiments have become successful because they assess causal claims in ways that other methods of evaluation find hard to emulate Social scientists and evaluators have rediscovered how to design and analyze field experiments but they have paid much less attention to the challenges of organizing and managing them Field experiments pose unique challenges and opportunities for the researcher and evaluator which come from working in the field The research experience can be challenging and at times hard to predict This book aims to help researchers and evaluators plan and manage their field experiments so they can avoid common pitfalls It is also intended to open up discussion about the context and backdrop to trials so that these practical aspects of field experiments are better understood The book sets out ten steps researchers can use to plan their field experiments then nine threats to watch out for when they implement them There are cases studies of voting and political participation elites welfare and employment nudging citizens and developing countries
