Goodfriend,2005 A Gateway to Higher Mathematics integrates the process of teaching students how to do proofs into the framework of displaying the development of the real number system The text eases the students into learning how to construct proofs while preparing students how to cope with

the type of proofs encountered in the higher level courses of abstract algebra analysis and number theory After using this text the students will not only know how to read and construct proofs they will understand much about the basic building blocks of mathematics The text is designed so that the professor can choose the topics to be emphasized while leaving the remainder as a reference for the students   *Java 5 Illuminated* Julie Anderson,Hervé Franceschi,2005 With a variety of interactive learning features and user friendly pedagogy Java 5 Illuminatedprovides a comprehensive introduction to programming using the most current version of the Java language Java 5 In addition to providing all of the material necessary for a complete introductory course in Java programming the book also features flexible coverage of other topics of interest including Graphical User Interfaces data structures file input and output and applets Object Oriented Programming concepts are developed progressively and reinforced through numerous Programming Activities allowing students to fully understand and implement both basic and sophisticated techniques at a pace which is neither too fast nor too slow OO concepts are blended appropriately with fundamental programming techniques including accumulation counting finding maximum and minimum values and using flag and toggle variables and supplemented with coverage of sound software engineering practices Distinguishing this text from other introductory Java books is the authors extensive use of an active learning approach to presenting the material through abundant use of graphics visualization exercises animations numerous full and partial program examples group projects and best practices These and other pedagogical devices facilitate hands on interactive learning and make the book equally appropriate for use in traditional lecture environments a computer equipped classroom or lab environment Java 5 Illuminated Errata Sheet   Computational Counterpoint Worlds Octavio Alberto Agustín-Aquino,Julien Junod,Guerino Mazzola,2015-07-08 The mathematical theory of counterpoint was originally aimed at simulating the composition rules described in Johann Joseph Fux s Gradus ad Parnassum It soon became apparent that the algebraic apparatus used in this model could also serve to define entirely new systems of rules for composition generated by new choices of consonances and dissonances which in turn lead to new restrictions governing the succession of intervals This is the first book bringing together recent developments and perspectives on mathematical counterpoint theory in detail The authors include recent theoretical results on counterpoint worlds the extension of counterpoint to microtonal pitch systems the singular homology of counterpoint models and the software implementation of contrapuntal models The book is suitable for graduates and researchers A good command of algebra is a prerequisite for understanding the construction of the model   **Network Cabling Illuminated** Robert Shimonski,Richard T. Steiner,Sean M. Sheedy,2006 This Book Covers All Aspects Of Network And Communications Cabling Including Physical Characteristics Of The Various Types Of Cabling Installation Design And Implementation Guidelines Cabling Standards And Specifications Software And Hardware Tools For Testing And Monitoring Installations And Premises Wiring With A Heavy Focus On Developing Hands On Skills And Including Many Labs And Group Exercises For Learning Reinforcement The Book Thoroughly Prepares Readers For The Certification Objectives
