for non majors courses in environmental science environmental studies and environmental biology Environmental Science
Foundations and Applications emphasizes critical thinking and quantitative reasoning skills Students learn how to analyze
graphs measure environmental impact on various scales and use simple calculations to understand key concepts With a solid
understanding of science fundamentals and how the scientific method is applied students are able to evaluate information
objectively and draw their own conclusions The text equips students to interpret the wealth of data they will encounter as
citizens professionals and consumers **Foundations of Education: Instructional strategies for teaching children

or Save the Rhetoric?** David H. Goldenberg, 2021-01-28 Save Lives or Save the Rhetoric is for those who think for
themselves and follow the logic and the evidence wherever it leads It offers an alternative to believing what others tell us
through the media the pundits the politicians and all those partisans who benefit from their particular narratives Whether we
know it or not we are inundated with rhetoric that is based on the numerous forms of flawed reasoning and fallacies which
are discussed in this book The first step is to develop the skills needed to distinguish between rhetorical claims and evidence
based claims This book provides a method to accomplish that David H Goldenberg presents and shows how to debug many
currently relevant real world examples Innovative discussion questions provide the reader an opportunity to practice and be
actively involved This book is not about taking positions but about learning how to analyze and assess them using logic
evidence data analysis and economics not confirmation bias Hopefully the reader will resist the rhetoric with its reductionism
and polarization by depoliticizing their approach to this book's intent and content The goal of the examples theory case
studies economics statistics historical documents and data analysis offered in Save Lives or Save the Rhetoric is to provide

citizens with an informed approach to examining and evaluating the issues the rhetoric and the evidence in order to ultimately make their own informed decisions The second part of the book delves into concepts and methods that any intelligent citizen may apply in order to make informed decisions about policy proposals The objective throughout is pedagogy not partisanship to help the reader better understand current events better identify the rhetoric in partisan debates and better evaluate public policy

Foundations and Practice of Research Andrew Basden, 2019-10-11 Many of the issues on which meaningful research is founded are seldom discussed for example the role of everyday experience diversity and coherence of meaning in the world the meaningfulness and wider mandate of research the very nature and validity of theoretical thought and the deep presuppositions of philosophy and how they undermine the success of research Such questions are material to the philosophies that guide research thinking in all fields and since they cannot be satisfactorily addressed in a piecemeal fashion this book employs the radically different philosophy of Herman Dooyeweerd to consider them together Parts I and II discuss these issues theoretically and philosophically while Part III discusses them practically specifically the adventures that researchers across the world have had using Dooyeweerd s philosophy Foundations and Practice of Research assembles a wide range of experiences of using Dooyeweerd s philosophy in research in the fields of mathematics the natural sciences the social sciences design sciences and the humanities Case studies demonstrate how Dooyeweerd s philosophy has been found fruitful in most stages of research and the philosophical discussion backs this up This book challenges researchers to join the

adventures including suggestions of potential research that could be carried out as well as questions still left unanswered

Stand and Prosper Henry N. Drewry, Humphrey Doermann, 2012-03-29 *Stand and Prosper* is the first authoritative history in decades of black colleges and universities in America It tells the story of educational institutions that offered and continue to offer African Americans a unique opportunity to transcend the legacy of slavery while also bearing its burden Henry Drewry and Humphrey Doermann present an up to date and comprehensive assessment of their past present and possible future Black colleges fully got off the ground only after the Civil War more than two centuries after higher education formally began in British North America Despite horrendous obstacles they survived and even proliferated until well past the mid twentieth century As the authors show however the 1954 U S Supreme Court ruling in *Brown v Board of Education* brought them to a crucial juncture While validating the rights of blacks to pursue opportunities outside racial and class lines it drew the future of these institutions into doubt By the mid 1970s black colleges competed with other colleges for black students a welcome expansion of choices for African American youth but a huge recruitment challenge for black colleges The book gradually narrows its focus from a general history to a look at the development of forty five private black colleges in recent decades It describes their varied responses to the changes of the last half century and documents their influence in the development of the black middle class The authors underscore the vital importance of government in supporting these institutions from the Freedman s Bureau during Reconstruction to federal aid in our own time *Stand and Prosper* offers a fascinating portrait of the distinctive place black colleges and universities have occupied in American history as crucibles of black culture and of the formidable obstacles they must surmount if they are to continue fulfilling this important role
