

The background of the book cover is a photograph of a modern building's exterior. The building features a prominent vertical garden facade, which is a wall covered in a dense, multi-layered arrangement of various green plants, including ferns and leafy species. The building's structure is composed of dark, horizontal and vertical metal beams that frame large glass windows. The windows reflect the surrounding environment, showing bare trees and a bright sky. The overall aesthetic is one of sustainable architecture and urban greening.

Sustainability in Business David Hobson Myers, 2020-09-01

This book provides an approach to sustainable decision making rooted in financial and economic literature. Financial and economic techniques have the power to frame the discussion of sustainability to explain who, how and why sustainability is a growing phenomenon in business and investing. Financial concepts in a sustainable framework provide a theoretical basis to approach research and business questions on sustainability. The framework provides for a better understanding of the different definitions of sustainability and the role those differences have on decisions that will lead to the future of sustainable business. A future which relies on growth driven by expanding its markets, reach demographics, its innovation or creation of new products and its capital structure leverage. Third party certification and governmental regulation become the constraints on that growth as well as the proof of sustainable growth. Finally, the ability and methods for investors to support sustainable growth is addressed in a modern portfolio theory analysis.
