*Cognition and Instruction* Sharon M. Carver, David Klahr, 2013-06-17 This volume is based on papers presented at the 30th Carnegie Mellon Symposium on Cognition This particular symposium was conceived in reference to the 1974 symposium entitled Cognition and Instruction In the 25 years since that symposium reciprocal relationships have been forged between psychology and education research and practice and laboratory and classroom learning contexts Synergistic advances in theories empirical findings and instructional practice have been facilitated by the establishment of new

interdisciplinary journals teacher education courses funding initiatives and research institutes So with all of this activity where is the field of cognition and instruction How much progress has been made in 25 years What remains to be done This volume proposes and illustrates some exciting and challenging answers to these questions Chapters in this volume describe advances and challenges in four areas including development and instruction teachers and instructional strategies tools for learning from instruction and social contexts of instruction and learning Detailed analyses of tasks subjects knowledge and processes and the changes in performance over time have led to new understanding of learners representations their use of multiple strategies and the important role of metacognitive processes New methods for assessing and tracking the development and elaboration of knowledge structures and processing strategies have yielded new conceptualizations of the process of change Detailed cognitive analysis of expert teachers as well as a direct focus on enhancing teachers cognitive models of learners and use of effective instructional strategies are other areas that have seen tremendous growth and refinement in the past 25 years Similarly the strong impact of curriculum materials and activities based on a thorough cognitive analysis of the task has been extended to the use of technological tools for learning such as intelligent tutors and complex computer based instructional interfaces Both the shift to conducting a significant portion of the cognition and instruction research in real classrooms and the increased collaboration between academics and educators have brought the role of the social context to center stage

**Fostering Children's Mathematical Power** Arthur Baroody, Arthur J. Baroody, Jesse L.M. Wilkins, Ronald T. Coslick, 1998-09-01 Teachers have the responsibility of helping all of their students construct the disposition and knowledge needed to live successfully in a complex and rapidly changing world To meet the challenges of the 21st century students will especially need mathematical power a positive disposition toward mathematics curiosity and self confidence facility with the processes of mathematical inquiry problem solving reasoning and communicating and well connected mathematical knowledge an understanding of mathematical concepts procedures and formulas This guide seeks to help teachers achieve the capability to foster children s mathematical power the ability to excite them about mathematics help them see that it makes sense and enable them to harness its might for solving everyday and extraordinary problems The investigative approach attempts to foster mathematical power by making mathematics instruction process based understandable or relevant to the everyday life of students Past efforts to reform mathematics instruction have focused on only one or two of these aims whereas the investigative approach accomplishes all three By teaching content in a purposeful context an inquiry based fashion and a meaningful manner this approach promotes children s mathematical learning in an interesting thought provoking and comprehensible way This teaching guide is designed to help teachers appreciate the need for the investigative approach and to provide practical advice on how to make this approach happen in the classroom It not only dispenses information but also serves as a catalyst for exploring conjecturing about discussing and contemplating the teaching and learning of mathematics
