Fraction Problem Solving

Directions: Solve the fraction problems below. Use objects, act it out, draw a picture, or write an equation for each problem.

Mrs. Medeiros, our teacher, just bought a box of 150 crayons! She asked Shandra and me to split the pack into fifths, and place the them in buckets on each table. How many crayons were put into each bucket?

George and Tricia took 93 photographs of the fundraiser for the school. When it was over, one third of the pictures were framed and hung around the city. How many pictures were not framed?

Leif and Cru were playing with their new blocks. One fourth of the blocks were blue, $\frac{1}{4}$ were green, another fourth were yellow, and the last 10 were red. How many blocks were there altogether?

Jess and Mark hiked the 2,200 mile appalachian trail last summer. Half of the trail was hiked wearing shorts and t-shirts. The other half was hiked wearing long pants and sweatshirts. How many miles did they hike in shorts?

In the 30 days of this past September, $\frac{1}{6}$ of the days were at or above 80°F. How many days were below 80°F?

Cianca's vision is that teachers serve as well equipped change agents that will empower their students to transfer STEM learning into applications that will impart a positive impact on our future world **ENC Focus**, 1994 **Los Angeles School Journal**, 1921 Eureka Math Grade 4 Study Guide Great Minds, 2015-11-09 Eureka Math is a comprehensive content rich PreK-12 curriculum that follows the focus and coherence of the Common Core State Standards in Mathematics CCSSM and carefully sequences the mathematical progressions into expertly crafted instructional modules. The companion Study Guides to Eureka Math gather the key components of the curriculum for each grade into a single location unpacking the standards in detail so that both users and non users of Eureka Math can benefit equally from the content presented. Each of the Eureka Math Curriculum Study Guides includes narratives that provide educators with an overview of what students should be learning throughout the year, information on alignment to the instructional shifts and the standards design of curricular components, approaches to differentiated instruction and descriptions of mathematical models. The Study Guides can serve as either a self study professional development resource or as the basis for a deep group study of the standards for a particular grade. For teachers who are new to the classroom or the standards, the Study Guides introduce them not only to Eureka Math but also to the content of the grade level in a way they will find manageable and useful. Teachers familiar with the Eureka Math curriculum will also find this resource valuable as it allows for a meaningful study of the grade level content in a way that highlights the coherence between modules and topics. The Study Guides allow teachers to obtain a firm grasp on what it is that students should master during the year. The Eureka Math Curriculum Study Guide Grade 4 provides an overview of all of the Grade 4 modules including Place Value, Rounding and Algorithms for Addition and Subtraction, Unit Conversions and Problem Solving with Metric Measurement, Multi-Digit Multiplication and Division, Angle Measure and Plane Figures, Fraction Equivalence, Ordering and Operations, Decimal Fractions and Exploring Measurement with Multiplication.

Visible Learning for Mathematics, Grades K-12 John Hattie, Douglas Fisher, Nancy Frey, Linda M. Gojak, Sara Delano Moore, William Mellman, 2016-09-15 Selected as the Michigan Council of Teachers of Mathematics winter book club book. Rich tasks, collaborative work, number talks, problem based learning, direct instruction with so many possible approaches: how do we know which ones work the best? In *Visible Learning for Mathematics*, six acclaimed educators assert it's not about which one it's about when and show you how to design high impact instruction so all students demonstrate more than a year's worth of mathematics learning for a year spent in school. That's a high bar, but with the amazing K-12 framework here, you choose the right approach at the right time depending upon where learners are within three phases of learning: surface, deep, and transfer. This results in visible learning because the effect is tangible. The framework is forged out of current research in mathematics combined with John Hattie's synthesis of more than 15 years of education research involving 300 million students. Chapter by chapter and equipped with video clips, planning tools, rubrics and templates, you get the inside track on which instructional strategies to use at each phase of the learning cycle. Surface learning phase. When through carefully

constructed experiences students explore new concepts and make connections to procedural skills and vocabulary that give shape to developing conceptual understandings Deep learning phase When through the solving of rich high cognitive tasks and rigorous discussion students make connections among conceptual ideas form mathematical generalizations and apply and practice procedural skills with fluency Transfer phase When students can independently think through more complex mathematics and can plan investigate and elaborate as they apply what they know to new mathematical situations To equip students for higher level mathematics learning we have to be clear about where students are where they need to go and what it looks like when they get there Visible Learning for Math brings about powerful precision teaching for K 12 through intentionally designed guided collaborative and independent learning
