Coll,2024-02-27 A New York Times and Washington Post Notable Book Named a Best Book of the Year by The New Yorker Nominated for a National Book Critics Circle Award in Nonfiction Excellent A more intimate picture of the dictator s thinking about world politics local power and his relationship to the United States than has been seen before The New York Times Another triumph from one of our best journalists The Washington Post Voluminously researched and compulsively readable Air Mail From bestselling and Pulitzer Prize winning author Steve Coll the definitive story of the decades long relationship between the United States and Saddam Hussein and a news breaking investigation into one of the costliest geopolitical conflicts of our time When the United States invaded Iraq in 2003 its message was clear Iraq under the control of strongman Saddam Hussein possessed weapons of mass destruction that if left unchecked posed grave danger to the world But when no WMDs were found the United States and its allies were forced to examine the political and intelligence failures that had led to the invasion and the occupation and the civil war that followed One integral question has remained unsolved Why had Saddam seemingly sacrificed his long reign in power by giving the false impression that he had hidden stocks of dangerous weapons The Achilles Trap masterfully untangles the people ploys of power and geopolitics that led to America s disastrous war with Iraq and for the first time details America s fundamental miscalculations during its decades long relationship with Saddam Hussein Calling on unpublished and underreported sources interviews with surviving participants and Saddam s own transcripts and audio files Steve Coll pulls together an incredibly comprehensive portrait of a man who was convinced the world was out to get him and acted accordingly A work of great historical significance The Achilles Trap exposes how corruptions of power lies of diplomacy and vanity on both sides led to avoidable errors of statecraft ones that would enact immeasurable human suffering and forever change the political landscape as we know it Reforming Lessons: Why English

Schools Have Improved Since 2010 and How This Was Achieved Nick Gibb,Robert Peal,2025-08-18 Reforming Lessons provides a first hand account of the ambitious programme of reform that has led to a transformation in English schools since 2010 and seen pupils rise through the ranks of international comparison tests such as PIRLS and PISA Co authored by former Schools Minister Nick Gibb and Headteacher Robert Peal the book explores the key principles behind the reforms and

Grading for Equity Joe Feldman,2023-08-26 For some time traditional A F grading practices have been under fire from a wide range of stakeholder Grading policies are wildly inconsistent from classroom to classroom frequently misguided uninformed and frequently based on subjective judgments Of even more concern our grading practices exacerbate the achievement gap It is well documented that African American and Latino students boys as well as special education students are disproportionately suspended and expelled influenced by teachers unconscious but biased judgments of student behavior Virtually ignored is how teachers incorporate subjective and non academic criteria into their grades through criteria such as student attitude participation and effort and how approach to grading contributes to these same students disproportionately high course failure rates and disproportionately low placement in advanced academic tracks

Subtle Webs Jose Eos Trinidad,2024 Subtle Webs provides an unprecedented behind the scenes look at how local organizations in Chicago Philadelphia and New York City have transformed data and worked with schools to solve the problem of dropping out In the process the book reveals how

organizations outside schools have created an invisible infrastructure not only to affect local school districts but also to shape US education. The book argues that changes in a decentralized system happen less through top down policy mandates or bottom up social movements and more through outside initiatives of networked organizations spread across various local systems. By documenting the work and webs of researchers, nonprofit leaders, philanthropic managers, and school coaches, the book clarifies the complex ways for large scale change to happen through new information technologies, intentional network structures on the ground, routines, and connections across various areas. By detailing change across multiple levels and across multiple locations, Jose Eos Trinidad uncovers new ways to think about educational transformation, policy reform, and organizational change. He highlights the potential for education research to transform everyday practices, the ways policies can move and adapt across local spaces, and the actors and factors needed to sustain changes. More than just about dropout prediction, the book provides a frame to interrogate transformations in US education and public policy. Social scientists, education leaders, and nonprofit professionals will find in the book helpful concepts to reveal the subtle dynamics shaping American schools.
