Ndlovu-Gatsheni,2022-12-30 The Paradox of Planetary Human Entanglements provides a nuanced understanding of the complexity of planetary human entanglements in this age of increased borderisation and territorialisation racism and xenophobia and inclusion and exclusion One of the greatest paradoxes of the 21st century is that of increased planetary human entanglements enabled by globalisation on the one hand and by the rising tide of exclusionary right wing politics of racism xenophobia and the building of walled states on the other The characteristic feature of this paradox is the unrestrained move towards the detention and incarceration of those who attempt to migrate This brings to the fore the issue of borders in terms of their materiality and symbolism and how this mediates belonging citizenship and the ethics or lack thereof and politics of living together This book shows that at the core of border and migration restrictions is the desire to exclude certain categories of people which aptly demonstrates that borders in their materiality are not for everyone but for those who are considered undesirable migrants The authors examine questions of borders nationalism migration immigration and belonging setting the basis of a campaign for planetary humanism grounded on human dignity which transcends ethnicity and nationality This book will be a useful resource for students scholars and researchers of African Studies Border Studies Migration Studies Development Studies International Studies Black Studies International Relations and Political Science      **Environmental Communication and the Public Sphere** Phaedra C. Pezzullo,Robert Cox,2025-08-12 The Seventh Edition of the award winning Environmental Communication and the Public Sphere is the best selling comprehensive introduction in the field of environmental communication This groundbreaking book focuses on the role that human communication plays in influencing the ways we perceive transform and attempt to heal relations with everything we consider to be the environment from microscopic chemicals in cosmetics to the climate we breathe Authors Phaedra C Pezzullo and Robert Cox examine how we define what constitutes an environmental problem and how we decide what actions to take concerning the natural world The updated and

revised Seventh Edition explores recent events and research that have emerged since the last edition including the latest on the impact of artificial intelligence AI on journalism climate commitments of Big Tech global climate justice course cases mutual aid networking ultra processed food policy anti plastics advocacy expanding legal rights of nonhuman animals and more     United States Code United States,2018
