international humanitarian law IHL strikes a realistic and meaningful balance between military necessity and humanity and
that the law therefore accounts for military necessity To what consequences does the law accounting for military necessity
give rise Through real life examples and careful analysis this book challenges received wisdom on the subject by devising a
new theory that not only reaffirms Kriegers son s fallacy but also explains why IHL has no reason to restrict or prohibit
militarily unnecessary conduct on that ground alone Additionally the theory hypothesises greater normative significance for
humanitarian and chivalrous imperatives when they conflict with IHL rules By combining international law jurisprudence
military history strategic studies and moral philosophy this book reveals how rational fighting relates to ethical fighting how
IHL incorporates contrasting values that shape its rules and how law and theory adapt themselves to war s evolutions
