**Sustainable Agriculture and Food** Jules N. Pretty, 2008 Jules Pretty brings together the most comprehensive and carefully selected collection of writings available about sustainable agriculture Together with an excellent overview chapter

the collected works provide the best available source for an enlightened analysis and debate about sustainability in agriculture. The four volumes will serve both as an excellent reader for students and a unique reference for all with an interest in the pursuit of sustainability in the food system. Professor Per Pinstrup Andersen, Cornell University, former Chair of CGIAR Science Council and World Food Prize Laureate 2001. This is the single most comprehensive overview of sustainable agriculture from ancient beginnings to the most topical modern issues. Jules Pretty has assembled a marvellous collection of the most seminal papers that are driving sustainable agriculture in all parts of the world. Jeffrey A. McNeely, Chief Scientist IUCN, The World Conservation Union. Showing that after all humans can learn from experience, Jules Pretty has woven together the best of the old with the best of what is new and visionary. He gives us a solid knowledge-based foundation for a badly needed new paradigm that of an agriculture which sustains all life into the longer term. The impressive list of contributors ensures that all relevant areas have been competently assessed. A unique reference work for teachers, students and practitioners. Hans R. Herren, World Food Prize Laureate 1995. An ambitious and deeply insightful series that unites the great minds not just of the agricultural, nutrition and environmental sciences but also history, culture, economics, technology, learning and communications, policy, regulatory and institutional approaches. It will be a major reference work for all interested in the future of humanity and sustainable food and agricultural systems. Parviz Koohafkan, Director, Environment, Climate Change and Bioenergy Division, FAO, Italy. This work presents a body of knowledge that has come of age. It takes into account not only the science but also human behaviour, institutions and politics. It will be an invaluable support for practices that are rapidly gaining significance. Professor Neils R. Ling, formerly of Wageningen University, The Netherlands. This 4-volume set, edited by the world's leading expert on agricultural sustainability, brings together and interprets the most influential, important and time-tested international scholarship across the fields of agriculture and food production with a set overview and individual volume introductions that make sense of this diverse and complex field. Volume I covers the history of agriculture from its ancient origins through successive technological and institutional revolutions to the present. Volume II examines the relationship between agriculture and the environment, including agricultural contamination, greenhouse gases and climate change, environmental improvements and sustainability, integrated farming, eco-agriculture and agro-ecology, landscape restoration and environmental goods and services. Volume III provides full coverage of the modern industrialized global food system, corporate control, poverty, hunger and international successes, failures and challenges, diet and health, consumer behaviour and local alternatives to industrialization. Volume IV addresses how we think about land and our relationship to it, governance and stewardship of the rural commons, systems thinking, ecological literacy, social connections and a sustainable rural life, supportive and perverse agricultural subsidies and policies that shape food, poverty and sustain agriculture into the future.

*Post-Growth Living* Kate Soper, 2020-09-29. The reality of runaway climate change is inextricably linked with the mass consumerist capitalist society in which we live. And the cult of endless growth and endless

consumption of cheap disposable commodities isn't only destroying the world it is damaging ourselves and our way of being. How do we stop the impending catastrophe and how can we create a movement capable of confronting it head on? In *Alternative Prosperity* philosopher Kate Soper offers an urgent plea for a new vision of the good life one that is capable of delinking prosperity from endless growth. Instead she calls for a renewed emphasis on the joys of being one that is capable of collective happiness not in consumption but by creating a future that allows not only for more free time and less conventional and more creative ways of using it but also for more fulfilling ways of working and existing. This is an urgent and necessary intervention into debates on climate change.

**The Political Ecology of Agrofuels** Kristina Dietz, Bettina Engels, Oliver Pye, Achim Brunnengräber, 2014-11-20 This book explores the political ecology of agrofuels as an encompassing socio-spatial transformation process consisting of a series of changing contexts political reconfigurations and the restructuring of social and labour relations. It includes conceptual chapters as well as case studies from different world regions North America Europe Latin America sub-Saharan Africa Asia and levels local national transnational. *The Political Ecology of Agrofuels* advances a conceptualisation of agrofuels that helps to fill existing research gaps. It covers global food regimes and agrarian politics as well as political arenas such as energy climate transport and trade. It reflects on the biophysical materiality of agrofuels new forms of nature appropriation struggles discursive framings the building of hegemony shifting geopolitical constellations socio-spatial configurations of power the construction of territory the agency of social movements and the different ways in which agrofuels are politicized at different scales. This book asks how patterns of mobility emissions regulation food and energy production and consumption and social relations e.g. labour class and gender relations are shaped and re-shaped by the materiality and representations of agrofuels in both the Global South and North. The book provides tools for thinking about the diversity of the conflicts struggles and spatial socio-ecological and politico-economic reconfigurations and perpetuations engendered by current production and consumption patterns in the agrofuel sector.
