Assessing the Quality of Cancer Care National Research Council, Institute of Medicine, National Cancer Policy Board, Committee on Assessing Improvements in Cancer Care in Georgia, 2005-06-18
Shortly after 1998 leading members of Georgia's government medical community and public spirited citizenry began considering ways in which some of Georgia's almost 5 billion 25 year settlement from the tobacco industry's Master Settlement Agreement with the 50 states could be used to benefit Georgia residents. Given tobacco's role in causing cancer they decided to create an entity and program with the mission of making Georgia a national leader in cancer prevention treatment and research. This new entity called the Georgia Cancer Coalition Inc GCC and the state of Georgia subsequently began implementing a far reaching state cancer initiative that includes five strategic goals: 1 preventing cancer and detecting existing cancers earlier 2 improving access to quality care for all state residents with cancer 3 saving more lives in the future 4 training future cancer researchers and caregivers and 5 turning the eradication of cancer into economic growth for Georgia. *Assessing the Quality of Cancer Care* identifies a set of measures that could be used to gauge Georgia's progress in improving the quality of its cancer services and in reducing cancer related morbidity and mortality.
