

How to cite a website in APA Style

Published on November 5, 2020 by [Jack Casilfield](#). Revised on February 1, 2021.

This article reflects the **APA 7th edition** guidelines. [Click here](#) for APA 6th edition guidelines. APA website citations usually include the author, the publication date, the title of the page or article, the website name, and the URL. If there is no author, start the citation with the title of the article. If the page is likely to change over time, add a retrieval date.

If you are citing an online version of a print publication (e.g. a [newspaper](#), [magazine](#), or [dictionary](#)), use the same format as you would for print, with a URL added at the end. Formats differ for [online videos](#) (e.g. [TED Talks](#)), [images](#), and [dissertations](#).

Use the buttons below to explore the format.

Citing an entire website

When you refer to a website in your text without [quoting](#) or [paraphrasing](#) from a specific part of it, you don't need a formal citation. Instead, you can just include the URL in parentheses after the name of the site:

One of the most popular social media sites, Instagram (<http://instagram.com>), allows users to share images and videos.

For this kind of citation, you don't need to include the website on the [reference page](#). However, if you're citing a specific page or article from a website, you will need a formal [in-text citation](#) and reference list entry.
