Observational Filmmaking for Education Nigel Meager, 2019-02-21 This book places observational filmmaking in the context of the rapidly developing landscape of creativity and arts based research in education The author uses observational filmmaking as a lens to address debates surrounding video based and arts based research Utilising the work of Dewey and Deleuze as the theoretical underpinnings of the volume this is combined with numerous practical examples of observational filmmaking in schools The author argues that observational video camera

and editing techniques combine careful observation with rigorous visual analysis they place sensory affectual and aesthetic qualities in experience centre stage While observational filmmaking in itself has enormous potential as a methodology for education research it may also become a fulcrum for children s learning Children record their experiences in the world around them as they look carefully with a video camera This pioneering yet practical book will be of interest and value to students and scholars of creativity learning and education research methods as well as constituting a useful guide for teachers arts practitioners and education policy makers

Learning to Photograph - Volume 1 Cora Banek, Georg Banek, 2013-08-27. The two volumes of the Learning to Photograph series give students and interested amateur photographers essential information about technique and design as well as an understanding of the big concepts of photography. This first volume brings readers up to speed on the basics of camera technology, optics and exposure. The authors provide an overview of these technical elements before going into detail about how cameras and lenses work and how they influence one another. Building upon this foundation the authors discuss the practical application of this knowledge showing readers how to put this information to use to create images and realize ideas effectively. The numerous example photos and informational graphics not only illustrate the concepts at hand but also make the lessons visually pleasing and offer inspiring templates for readers to imitate in their own craft. Topics include Optics and lenses, Exposure, metering and control, Image sensors, viewfinders and displays, Live view and video functionality, Flash units and additional accessories, The right camera, Photo technology in practice. The subsequent volume in the Learning to Photograph series addresses visual concepts and composition.

The Mobile Photographer Robert Fisher, 2014-12-30. It's been said that with smartphones everyone is a photographer. There is a snide implication with that statement that camera phones aren't real cameras and that the people who use them aren't real photographers. In this book Robert Fisher proves that today's Android devices offer cameras that are remarkably powerful and more than capable of producing images that rival those made with more serious equipment. In this book Fisher guides readers through the menus of the Android operating system helping them to understand how to choose and use out of the box controls for better images. Next he covers
