1. Fill in the five levels of human body organization from smallest to largest.

2. Place the five examples below in order from largest to smallest:
Stomach, Epithelial Tissue, You, Digestive System, Parietal cells

3. Give an example of how your body would maintain homeostasis in the following situations:
- You have gotten cold while sledding and playing in the snow in January

Your body will shiver to warm your body temperature up

- You are exercising by cross-country skilling and need more oxygen for your muscles.

Your breathing rate will get faster to bring in more oxygen AND your heart will pump faster/harder to move more blood carrying oxygen to your body

- You ate a lot of snow and it melted and turned into water in your excretory system.

The excess water will be filtered from your blood by your kidneys and then it will move to your bladder before leaving the body when you go tinkle
