

Human and Social Biology Syllabus

♦ RATIONALE

Human beings require knowledge of the ways in which the human body functions, of the interdependence of living things, and of the ways in which the total environment functions to support life on earth in all its forms. This will aid in making intelligent decisions on matters at home, at work or in society, which routinely affect their health and, therefore, the quality of their lives. The study of Human and Social Biology provides learners with an opportunity to begin acquiring this knowledge.

Human and Social Biology is concerned with the study of the structure and function of the human body. It also involves the application of biological principles, knowledge and skills, and technological advances, to the maintenance of health and harmonious living. Additionally, learners will gain an understanding of the impact of socio-cultural factors on the health of people and the community. The subject incorporates the view that human beings have a responsibility to their environment and, as such, have an obligation to conserve, protect, maintain and improve its quality.

The CSEC® Human and Social Biology syllabus allows learners to utilise theoretical concepts in an interactive and practical manner. This will facilitate the development of long-term transferable skills of ethical conduct, collaboration, problem solving, critical thinking, creativity and communication. It encourages the use of various teaching and learning strategies to inculcate these skills while catering to multiple intelligences and different learning styles. Students are expected to demonstrate an appreciation for all living organisms in their environment.

The CSEC® syllabus in Human and Social Biology provides Caribbean students with a foundation for further study in fields where an understanding of the structure and function of the human body and the application of biological principles to the maintenance of health are needed. It also helps to provide students with knowledge, skills and attitudes that are important for maintaining a healthy lifestyle and creates an awareness of the social determinants of disease prevention and control. *This syllabus will also prepare students for careers in allied health, physical education, food and nutrition and social work.*

This syllabus will contribute to the development of the Ideal Caribbean Person as articulated by the CARICOM Heads of Government in the following areas: respect for human life and awareness of the importance of living in harmony with the environment; multiple literacies; independent and critical thinking; the innovative application of science and technology to problem solving; promote physical, mental, social and spiritual well-being and contribute to the health and welfare of the community, country and region. Based on the UNESCO Pillars of Learning, this course of study will also contribute to a person who will learn to do, learn to live together and learn to transform themselves and society.
