Industrial Electronics N3 Memorandum November 2013:

Policies and Challenges of the Broadband Ecosystem in Japan Toshiya Jitsuzumi, Hitoshi Mitomo, 2022-02-22 This book shows how telecom broadcast and Internet researchers as well as experts from Japan's leading mobile operators interpret, analyze and evaluate the emerging phenomenon of the Japanese broadband ecosystem. The broadband ecosystem as it rapidly changes against the backdrop of swift technological progress is forcing major changes in the existing socioeconomic framework and generating many policy issues that require discussion. The book aims to provide a theoretical and practical framework for policymakers to address these issues from a broader perspective than has been available in the past. The topics addressed in this book cover sharing of 5G infrastructure, online platform regulation, diffusion of autonomous driving, content industry trends and use cases of 5G capacity development for AI ride hailing service, smartphone games, the right to be forgotten and the economic value of personal information. Although this book cannot provide definitive answers to all these recently emerging and rapidly changing issues, it does provide important guidance for evidence-based discussion involving policymakers and researchers working on these issues. It is also recommended for graduate students who want to enter this challenging field of policy discussion. **Serials Holdings in the Linda Hall Library, April 1, 1968** Linda Hall Library, 1968* **N3 Industrial Electronics**, 2014
