Understanding Psychological Testing in Children Stewart Gabel, G.D. Oster, S.M. Butnik, 2013-06-29 There is a considerable amount of interest within pediatrics and primary health care that is currently being directed toward the behavioral and emotional problems of childhood Traditionally these areas have been emphasized by child psychiatrists child

psychologists and psychiatric social workers Now however the detection and in some cases the assessment and treatment of children with these types of disturbances fall within the province of primary child health care professionals Even when the child psychiatrist or child psychologist provides the primary mental health treatment for the child specialists such as pediatricians family physicians pediatric nurses pediatric nurse practitioners and speech therapists remain instrumental in support of the ongoing psychotherapeutic process as providers of some other aspect of total health care to the child and family For these pediatricians family physicians and other nonpsychologist primary health care providers it is essential to acquire an understanding and effective working knowledge of important psychological information and concepts to utilize within their own framework and professional responsibilities In order that this may be accomplished these professionals with limited backgrounds in psychology must better understand how psychologists themselves assess children and how they derive the conclusions reflected in the statements and reports that are shared with members of their own and other disciplines In short nonpsychologists must become substantially more familiar with psychological assessment particularly with psychological testing and the subsequent reporting of results
