Description

Articulated hauler A40 consists of two main sections, the tractor unit and the load unit. The two units are joined by the frame joint which allows movement about a vertical axis for steering. The frame joint also allows the two units to twist and move in relation to each other along a horizontal axis.

The tractor unit consists of a six-cylinder diesel engine, transmission and dropbox as well as a drive axle. The cab is rubber-mounted to the frame. The frame is independently suspended in relation to the drive axle.

The load unit consists of a frame, elevation load body, as well as a front and rear drive axle, which are linked by the bogie suspension.

The hauler has constant 4-wheel drive with the possibility of engaging and disengaging

6-wheel drive. There is a longitudinal differential lock in the dropbox and there are differential locks on all drive axles.
