[Paying for Performance in Healthcare: Implications for Health System Performance and Accountability](#) Cheryl Cashin,Y-Ling Chi,Michael Borowitz,Sarah Thompson,2014-09-16 Health spending continues to grow faster than the economy in most OECD countries In 2010 the OECD published a study of strategies to increase value for money in health care in which pay for performance P4P was identified as an innovative tool to improve health system efficiency in several OECD countries

However evidence that P4P increases value for money boosts quality of processes in health care or improves health outcomes is limited This book explores the many questions surrounding P4P such as whether the potential power of P4P has been over sold or whether the disappointing results to date are more likely rooted in problems of design and implementation or inadequate monitoring and evaluation The book also examines the supporting systems and process in addition to incentives that are necessary for P4P to improve provider performance and to drive and sustain improvement The book utilises a substantial set of case studies from 12 OECD countries to shed light on P4P programs in practice Featuring both high and middle income countries cases from primary and acute care settings and a range of both national and pilot programmes each case study features Analysis of the design and implementation decisions including the role of stakeholders Critical assessment of objectives versus results Examination of the of net impacts including positive spillover effects and unintended consequences The detailed analysis of these 12 case studies together with the rest of this critical text highlight the realities of P4P programs and their potential impact on the performance of health systems in a diversity of settings As a result this book provides critical insights into the experience to date with P4P and how this tool may be better leveraged to improve health system performance and accountability This title is in the European Observatory on Health Systems and Policies Series
