Move from feeling anxious about the oil crisis to developing a positive vision and taking traction action to create a more self-reliant existence with this ground-breaking book. We live in an oil-dependent world and have become reliant in a very short space of time using vast reserves of oil in the process and without planning for when the supply is not so plentiful. Most of us avoid thinking about what happens when the oil runs out or becomes prohibitively expensive, but the reality may not be as bad as we think. *The Transition Handbook* shows how the inevitable and profound changes ahead could have a positive effect. Written by permaculture expert Rob Hopkins, he discusses the possibility of a rebirth of local communities which will generate their own fuel, food, and housing. These will encourage the development of local currencies to keep money in the local area and unleash a local skilling up so that people have more control over their lives. The growth in interest in the Transition model continues to be exponential. There are now more than 35 formal Transition Initiatives in the UK including towns, cities, islands, villages, and peninsulas, with more joining as the idea takes off. With little proactivity at government level, communities are taking matters into their own hands and acting locally. If your community has not yet become a Transition Initiative, this upbeat guide filled with beautiful black and white photographs offers you the tools to get

started The Transition Handbook is the perfect manual to guide communities as they begin this energy descent journey
