MacDonald, Ann Gervasoni, 2015-01-09 This edited book brings together for the first time an international collection of work focused on two important aspects of any young child's life learning mathematics and starting primary or elementary school. The chapters take a variety of perspectives and integrate these two components in sometimes explicit and sometimes more subtle ways. The key issues and themes explored in this book are the mathematical and other strengths that all participants in the transition to school bring to this period of a child's life, the opportunities provided by transition to school for young children's mathematics learning, the importance of partnerships among adults and among adults and children for effective school transitions and mathematics learning, and teaching the critical impact of expectations on their mathematics learning as children start school, the importance of providing children with meaningful challenging and relevant mathematical experiences throughout transition to school, the entitlement of children and educators to experience assessment and instructional pedagogies that match the strengths of the learners and the teachers, the importance for the aspirations of children, families, communities, educators and educational organisations to be recognised as legitimate and key determinants of actions, experiences and successes in both transition to school and mathematics learning, and the belief that young children are powerful mathematics learners who can demonstrate this power as they start school. In each chapter authors reflect on their work in the area of mathematics and transition to school, place that work within the overall context of research in these fields, predict the trajectory of this work in the future and consider the implications of the work both theoretically and practically.

Mentoring Mathematics Teachers Rosalyn Hyde, Julie-Ann Edwards, 2013-09-23 Designed to support both teachers and university based tutors in mentoring pre service and newly qualified mathematics teachers at both primary and secondary levels, Mentoring Mathematics Teachers offers straightforward practical advice that is based on practice underpinned by research and geared specifically towards this challenging subject area. Developed by members of The Association of Mathematics Education Teachers, the authors draw upon the most up to date research and theory to provide evidence based practical guidance. Themes covered include the recognition of the importance of pedagogical content knowledge, building upon subject knowledge, developing skills of self evaluation in order to reflect and develop your own practice, the on going need to address issues of equity and diversity within the profession, the need for pre service teachers and their mentors to work together effectively as a partnership, the importance of collaboration, shared goals, mutual benefit and growth. Addressing issues of mentoring for all trainee and practising mathematics teachers, Mentoring Mathematics Teachers demonstrates both the importance of mentoring in the development of new teachers of mathematics but also the benefits to all those who involve themselves in this challenging and rewarding task.

What's Left Now? Andrew Hindmoor,2018-01-26 Our sense of history shapes how we think about ourselves One of the distinguishing features of the left in Britain is that it holds to a remorselessly bleak and miserabilist view of our recent political history one in which Margaret Thatcher s election in 1979 marked the start of a still continuing fall from political grace made evident by the triumph of a free market get what you can neoliberal ideology dizzying levels of inequality social decay rampant individualism state

authoritarianism and political corruption The left does not like what has happened to us and it does not like what we have become Andrew Hindmoor argues that this history is wrong and self harming It is wrong because Britain has in many respects become a more politically attractive and progressive country over the last few decades It is self harming because this bleak history undermines faith in politics Post Brexit post Grenfell and post the 2010 2015 and 2017 general elections things may not right now look that great But looked at over the longer haul Britain is a long way from being a posterchild for neoliberalism Left wing ideas and arguments have shaped and continue to shape our politics
