It is both representative of mathematics education generally as well as unique to the particular geography and culture of Canada. The chapters address topics of broad applicability such as technology in learning mathematics, recent interest in social justice contexts in the learning of mathematics as well as Indigenous education. The voices of classroom practitioners, the group ultimately responsible for implementing this new vision of mathematics teaching and learning, are not forgotten. Each section includes a chapter written by a classroom teacher, making this volume unique in its approach. We have much to learn from one another and this volume takes the stance that the development of a united vision supported by both research and professional dialog provides the first step. *CTET Success Master Maths & Science Paper-2 for Class 6 to 8* 2020 Arihant Experts, 2020-01-02 Throughout the world, teaching is looked at as one of the most respected and noble professions a person could have.
