Measuring Angles Performance Task:

Implementing Performance Assessment Michael B. Kane, Ruth Mitchell, 2013-11-05 As the commitment to performance assessments as a strategy of reform has increased across the nation so has the controversy surrounding the purposes development implementation and effects of alternative forms of assessment One of the first of its kind this edited volume provides an incisive and comprehensive account of the issues pertaining to performance assessments The 10 papers comprising the volume were originally written to establish a conceptual framework for a three year U S Department of Education Office of Educational Research and Improvement sponsored national study of performance assessments Written by leading experts in the field the papers explicate the central issues regarding the development implementation and utility of performance assessments The topics covered by the papers include a discussion of contemporary as well as historical events in the performance assessment movement technical characteristics of performance assessments including reliability validity generalizability and calibration conceptualization and calculation of the costs of performance assessments the implications of performance assessments on students who have traditionally done less well in American schools including racial and linguistic minorities the fit between performance assessments and organizational change in education and the utilization of performance assessment as an instrument of state policy Readers will find the policy and technical issues covered in this volume to be useful from a variety of academic research and policy perspectives including conceptualizing and implementing performance assessments

Performance Assessment Brian McLean Semple, 1992 The second International Assessment of Educational Progress focused on the mathematics and science achievement of 13 year olds Performance assessments were used as part of the overall assessment in four countries England Scotland Soviet Union and Taiwan and five Canadian provinces The performance assessment approach drew heavily on the experience of the United Kingdom in such assessments but added features to meet the needs of an international study The performance tasks required students to apply concepts observe measure manipulate equipment and materials and record and interpret data Approximately 3 000 students participated in the 1991 mathematics and science assessments Scores varied widely from task to task and from country to country Relative performance of countries and provinces generally differed from those identified by written curriculum based tests A major lesson learned from the experimental test administration is that this form of performance assessment can be used reliably in international comparative studies although at an estimated cost three to four times greater than that for an equivalent number of written test questions Sample mathematics and science tasks are included and there is an appendix on problem solving in mathematics that describes outcomes produced by Scottish students

Designing Learning Environments for Developing Understanding of Geometry and Space Richard Lehrer, Daniel Chazan, 2012-11-12 This volume reflects an appreciation of the interactive roles of subject matter teacher student and technologies in designing classrooms that promote understanding of geometry and space Although these elements of geometry education are mutually constituted the book is organized to highlight first the editors vision of a general geometry education second the development of student thinking in everyday and classroom contexts and third the role of technologies Rather than looking to high school geometry as the locus and all too often the apex of geometric reasoning the contributors to this volume suggest that reasoning about space can and should be successfully integrated with other forms of mathematics starting at the elementary level and continuing through high school Reintegrating spatial reasoning into the mathematical mainstream indeed placing it at the core of K 12 mathematics environments that promote learning with understanding will mean increased attention to problems in modeling structure and design and reinvigoration of traditional topics such as measure dimension and form Further the editors position is that the teaching of geometry and spatial visualization in school should not be compressed into a characterization of Greek geometry but should include attention to contributions to the mathematics of space that developed subsequent to those of the Greeks This volume is essential reading for those involved in mathematics education at all levels including university faculty researchers and graduate students *Math Instruction for Students with Learning Difficulties* Susan Perry Gurganus, 2021-11-29 This richly updated third edition of *Math Instruction for Students with Learning Difficulties* presents a research based approach to mathematics instruction designed to build confidence and competence in preservice and inservice PreK 12 teachers Referencing benchmarks of both the National

Council of Teachers of Mathematics and Common Core State Standards for Mathematics this essential text addresses teacher and student attitudes towards mathematics as well as language issues specific mathematics disabilities prior experiences and cognitive and metacognitive factors Chapters on assessment and instruction precede strands that focus on critical concepts Replete with suggestions for class activities and field extensions the new edition features current research across topics and an innovative thread throughout chapters and strands multi tiered systems of support as they apply to mathematics instruction

The Teacher Practitioner and Mentor in Nursing, Midwifery, Health Visiting and the Social Services Peter Jarvis, Sheila Gibson, 1997 The extensive revisions and additions to this text reflect the changes in the way in which teaching and learning take place within health care education The roles of the teacher practitioner and the mentor are defined and discussed in detail and the importance of relationships within the education process is explored The authors also examine new developments in adult learning and the concept of the learning experience with particular emphasis on reflective practice and quality
