The three social scientists have all recognised that sociology is a science. Science is the use of systematic methods of empirical investigation, the analysis of data, theoretical thinking and logical assessment of arguments to develop a body of knowledge about a particular theme.<sup>3</sup> Similarly, Macionis defined science as a logical system that bases knowledge on systematic observation. Giddens definition of science endorsed sociology as a scientific endeavour for the reason that it engages systematic methods of empirical investigations, analysis of data and assessment of theories in the light of evidence and logical arguments. Sociology is one of the social sciences including economics, human geography and psychology that in the process of study attempts to explain and understand the behaviour of human beings in society. It is studied because it has usefulness as a scientific discipline.

## **USEFULNESS OF SOCIOLOGY**

Sociology arose out of the need to understand the structure, changes and development of society. Additionally, sociology emerged out of the need for knowledge about human social problems caused by people that eventually affects a lot of people. Thus, sociological knowledge is used to guide society and serve it from destruction. Sociology has several uses for our lives. **Time To Know Them** Marilyn S. Sternglass, 2017-09-25 In a time of declining resources in institutions of higher education we grapple with how priorities are to be set for the limited resources available Most vulnerable are those students labeled underprepared by colleges and universities Should we argue that the limited resources available ought to be used to support these students through their undergraduate years And if we decide that we want to do that what evidence of their potential for success can we provide that will justify the use of these resources Through longitudinal research that follows students who have been so labeled over all their college years we can begin to find answers to these questions Time to Know Them is the first book that follows the experiences of a group of students over their entire academic experience No previous studies have brought together the factors incorporated in this study examining writing and learning on a true longitudinal basis studying a multicultural urban population investigating the relationship between writing and learning by examining papers written over time for regularly assigned academic courses across a range of disciplines and taking into consideration non academic factors that influence academic performance such as race gender socio economic status and ideological orientation Through interviews twice a semester over six years the collection of papers written for all courses observations of instructional settings and analysis of required institutional tests of writing the author

has been able to pull together a more complete picture of writing and intellectual development over the college years than has previously been available in any study. Students are seen to acquire the ability to handle more complex reasoning tasks as they find themselves in more challenging intellectual settings and where risk taking and exploration of new ideas are valued. The integration of students' previous life experiences into their academic studies allows them to analyze, critique, modify, and apply their previously held world views to their new learning. These changes are seen to occur over time with instructional settings and support providing key roles in writing development. Personal factors in students' lives present difficulties that require persistence and dedication to overcome. Never before have the complexities of real individual lives as they affect academic performance been so clearly presented. Writing for Emerging Sociologists Angelique Harris, Alia

Considering the fact that the academic essay continues to be widely used as an assessment tool within education, there is a need for students to develop their skills in this area. However, it is often the case that students perceive instruction in academic writing, if it is offered at all, as boring. This book addresses these two issues. First, the book can be used by students themselves even in the absence of academic writing classes as a self help guide from which they can develop their knowledge of academic writing and subsequent proficiency. Second, by discussing the components of academic writing in terms such as film, which are familiar to today's generation, students are enabled to relate to the material better and see what might have been perceived as dull from a brand new perspective. Visual learners, in particular, will enjoy the analogous link between films and essays, and students today are arguably more visually literate than previous generations, being exposed to visuals on a daily basis through text message iconography, computer games, and the Internet. The visual instruction provided in turn helps to facilitate mental visuals in students' minds from which their knowledge of essay writing can start to develop. *Academic Writing: An Introduction - Third Edition* Janet Giltrow, Richard Gooding, Daniel Burgoyne, Marlene Sawatsky, 2014-09-03. *Academic Writing* has been widely acclaimed in all its editions as a superb textbook and an important contribution to the pedagogy of introducing students to the conventions of academic writing.
