Some of the classical fields of knowledge are geodesy, surveying, cartography, and geography. Electronics have revolutionized geodetic methods. Cartography has faced the dominance of the computer that results in simplified cartographic products. All three fields make use of basic components such as the Internet and databases. The Springer Handbook of Geographic Information is organized in three parts: Basics, Geographic Information, and Applications. Some parts of the basics belong to the larger field of computer science. However, the reader gets a comprehensive view on geographic information because the topics selected from computer science have a close relation to geographic information. The Springer Handbook of Geographic Information is written for scientists at universities and industry as well as advanced and PhD students.

International Handbook on Giftedness Larisa Shavinina, 2009-08-12 If you publish, you are trying to create something that is original, that stands out from the crowd. Above all, you want to create something you are proud of. Richard Branson, 2002, p. 57. After the publication of my bestselling *International Handbook on Innovation*, publishers from around the world began to invite me to work on new books with them. When Springer invited me to prepare the *International Handbook on Giftedness*, I was on a maternity leave with my 3 months old and my 5 year old was just starting school. I, however, had wanted to prepare such a Handbook for a long time and was waiting for just the right moment to dive right into such an endeavor. The time had come and I agreed to prepare a Handbook that would expose readers to new views, great discoveries, and significant advancements of scientific knowledge exactly as Richard Feynman advised. See his opening quote at the beginning of the introductory chapter: I have always been convinced of the paramount significance of the topic of giftedness and gifted education to the world as a whole. There is no doubt that gifted individuals are and will be extremely important to society. One way to understand the history of human civilization is via inventions and discoveries of the gifted. All human cultural development builds on the amazing technological, scientific, educational, and moral achievements of the human mind. Today, people increasingly realize that gifted and talented individuals are even more important than in the past.
