says there's never been a better time to buy a new car or truck thanks to a stronger Canadian dollar and an auto industry offering reduced prices more cash rebates low financing rates bargain leases and free auto maintenance programs In this all new guide he says Audis are beautiful to behold but hell to own biodegradable transmissions rodent snack wiring and mind boggling depreciation Many 2011-12 automobiles have chin to chest head restraints blinding dash reflections and dash gauges that can't be seen in sunlight not to mention painful wind tunnel roar if the rear windows are opened while underway Ethanol and hybrid fuel saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that killed its own electric car more than a decade ago You can save 2,000 by cutting freight fees and administrative charges Diesel annual urea fill up scams can cost you 300 including an 80 handling charge for 25 worth of urea Lemon Aid's 2011-12 Endangered Species List the Chinese Volvo the Indian Jaguar and Land Rover the Mercedes-Benz Smart Car Mitsubishi and Suzuki [Lemon-Aid New Cars and Trucks 2013](#) Phil Edmonston, 2012-12-01 Canada's automotive Dr Phil says there's never been a better time to buy a new car or truck thanks to a stronger Canadian dollar a worldwide recession driving prices downward and a more competitive Japanese auto industry that's still reeling from a series of natural disasters [Flow Manufacturing -- What Went Right, What Went Wrong](#) Richard J. Schonberger, 2018-11-12 This book tells 101 stories of company efforts to implement the many aspects of flow manufacturing including such topics as just in time production total quality control reorganization of factories into product focused or customer focused cells plants in a plant material flows by the simplicity of visual kanban supplier partnerships quick setup of equipment cross training and job rotation of the work force and many more The 101 mini case studies dubbed caselets include 26 non U.S. companies from 12 countries and cover a wide swath of industrial sectors and include many well known corporations such as Apple Campbell Soup Honeywell and Boeing From the 1980s to the present the author has been taking the message of process improvement and customer focused excellence far and wide Most of these travels usually in connection with delivering a seminar include brief factory tours in which he compiled detailed notes and then organized them as brief reports his unvarnished analysis or take on what they do well and what needs improvement In the main the reports were then sent back to the hosts of the plant tour These factory tours and these follow up reports form the basis of the large majority of this book's caselets Many of the caselets bring to life process improvement methodologies in detail With lots of caselets to draw from the readers will find vivid examples of similar companies and processes within their respective industries For example the caselets often include applications of advanced concepts in cost management employee training performance management supply chains and logistics as well as applications of plant layout quick setup material handling quality assurance scheduling ergonomics and flow analysis **Overcoming Barriers to Electric-Vehicle Deployment** Board on Energy and Environmental Systems, Division on Engineering and Physical Sciences, Transportation Research Board, 2013-07-02 The electric vehicle offers many promises increasing U.S. energy security by reducing petroleum

dependence contributing to climate change initiatives by decreasing greenhouse gas GHG emissions stimulating long term economic growth through the development of new technologies and industries and improving public health by improving local air quality There are however substantial technical social and economic barriers to widespread adoption of electric vehicles including vehicle cost small driving range long charging times and the need for a charging infrastructure In addition people are unfamiliar with electric vehicles are uncertain about their costs and benefits and have diverse needs that current electric vehicles might not meet Although a person might derive some personal benefits from ownership the costs of achieving the social benefits such as reduced GHG emissions are borne largely by the people who purchase the vehicles Given the recognized barriers to electric vehicle adoption Congress asked the Department of Energy DOE to commission a study by the National Academies to address market barriers that are slowing the purchase of electric vehicles and hindering the deployment of supporting infrastructure As a result of the request the National Research Council NRC a part of the National Academies appointed the Committee on Overcoming Barriers to Electric Vehicle Deployment This committee documented their findings in two reports a short interim report focused on near term options and a final comprehensive report Overcoming Barriers to Electric Vehicle Deployment fulfills the request for the short interim report that addresses specifically the following issues infrastructure needs for electric vehicles barriers to deploying the infrastructure and possible roles of the federal government in overcoming the barriers This report also includes an initial discussion of the pros and cons of the possible roles This interim report does not address the committee's full statement of task and does not offer any recommendations because the committee is still in its early stages of data gathering The committee will continue to gather and review information and conduct analyses through late spring 2014 and will issue its final report in late summer 2014 Overcoming Barriers to Electric Vehicle Deployment focuses on the light duty vehicle sector in the United States and restricts its discussion of electric vehicles to plug in electric vehicles PEVs which include battery electric vehicles BEVs and plug in hybrid electric vehicles PHEVs The common feature of these vehicles is that their batteries are charged by being plugged into the electric grid BEVs differ from PHEVs because they operate solely on electricity stored in a battery that is there is no other power source PHEVs have internal combustion engines that can supplement the electric power train Although this report considers PEVs generally the committee recognizes that there are fundamental differences between PHEVs and BEVs
