The Mathematics Lesson-Planning Handbook, Grades 6-8 Lois A. Williams, Beth McCord Kobett, Ruth Harbin Miles, 2018-12-28 Your blueprint to planning Grades 6-8 math lessons that lead to achievement for all learners. When it comes to planning mathematics lessons, do you sometimes feel burdened? Have you ever scrambled for an activity to engage your students that aligns with your state standards? Do you ever look at a recommended mathematics lesson plan and think, "This will never work for my students"? The *Mathematics Lesson Planning Handbook: Your Blueprint for Building Cohesive Lessons, Grades 6-8* walks you step by step through the process of planning focused, research-based mathematics lessons that enhance the coherence, rigor, and purpose of state standards and address the unique learning needs of your individual students. This resource deepens the daily lesson planning process for middle school teachers and offers practical guidance for merging routines, resources, and effective teaching techniques into an individualized and manageable set of lesson plans. The effective planning process helps you identify learning intentions and connect goals to success criteria; select resources and worthwhile tasks that make the best use of instructional materials; structure lessons differently for traditional and block middle school schedules; anticipate student misconceptions and evaluate understanding using a variety of formative assessment techniques; facilitate questioning, encourage productive struggle, and close lessons with reflection techniques. This author team of seasoned mathematics educators make lesson planning practical and doable with a useful lesson planning template and real-life examples from Grades 6-8 classrooms. Chapter by chapter, the decision-making strategies empower teachers to plan mathematics lessons strategically to teach with intention and confidence and to build purposeful, rigorous, coherent lessons that lead to mathematics achievement for all learners.

Moving Through Dimensions Clg Of William And Mary/Ctr Gift Ed, 2021-09-03 *Moving Through Dimensions* approaches spatial reasoning through one-dimensional, two-dimensional, and three-dimensional tasks designed for students in the middle school grades. The unit also asks students to explore the transition between dimensions and representations of three-dimensional objects in two dimensions. This book includes pre- and post-assessments, multiple reproducible materials, and lessons based on NCTM standards. *Moving Through Dimensions* was developed by the Center for Gifted Education at The College of William and Mary to offer advanced curriculum supported by years of research. The Center's materials have received national recognition from the United States Department of Education and the National Association for Gifted Children and they are widely used both nationally and internationally. Each of the books in this series offers curriculum that focuses on advanced content and higher-level processes. The science units contain simulations of real-world problems, and students experience the work of real science by using data-handling skills, analyzing information, and evaluating results. The mathematics units provide sophisticated ideas and concepts, challenging extensions, higher-order thinking skills, and opportunities for student exploration based on interest. These materials are a must for any teacher seeking to challenge and engage learners and increase achievement, Grades 6-8.
