Verfasser, 2017-10-21 Excerpt from The Half Tone Process A Practical Manual of Photo Engraving in Half Tone on Zinc and Copper HE present work the first that has been issued in the English language at least dealing with The half tone Process makes no pretensions to exhaustiveness The popular price at which it is issued rendered it necessary that the subject should be treated concisely My difficulty has therefore been to be comprehensive whilst being brief I hope I have succeeded in this respect My aim has been to make the book a practical manual and I have studiously avoided theoretical considerations The appliances and processes I have treated are such as are in use to day in the leading half tone studios and I have described no method but of which I have had personal experience To those who take this book up as a guide let me say that there are few businesses which depend for success so absolutely upon working under proper conditions and with suitable appliances as that of half tone I have avoided explaining how this or that may be used as a makeshift If any of my readers depart from these instructions in an endeavour to modify the method or dispense with some of the essential appliances they must only blame themselves if they fail As the numerous illustrations to this work so greatly increase its usefulness I must express my indebtedness to Messrs Penrose Co of the photo process Stores Clerkenwell London for not only lending all available blocks of their own specialities but also for collecting from abroad cliches of goods for which they are agents It is possible that I shall be blamed by some of the older members of the trade for having written such a book at all But the time has surely gone by for the old fashioned jealousy against trade handbooks The Spread of technical knowledge is now recognised to be as essential as elementary education to the progress of The community and so far from a trade being injured by publicity its methods may be in fact improved not only through the accession of new blood but also by the old workers finding their own knowledge increased and enlarged in the perusal of handbooks and trade journals About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections
