Policy and Practice in Science Education for the

Gifted Manabu Sumida, Keith Taber, 2017-03-16 Gifted education has come to be regarded as a key national programme in many countries and gifted education in science disciplines is now being recognised to be of major importance for economic and technological development. Despite these initiatives and developments internationally there are very few discussions on gifted education in science drawing upon practices and experiences in different national contexts. In support of an international dialogue between researchers and practitioners often working within isolated traditions this book offers information on key influential approaches to science education for gifted learners and surveys current policy and practice from a diverse range of educational contexts. The volume offers an informative introduction for those new to studying gifted science education as well as supporting the development of the field by offering examples of critical thinking about key issues and accounts of the influences at work within education systems and the practical complexities of providing science education for the gifted. The contributions draw upon a variety of research approaches to offer insights into the constraints and affordances of working within particular policy contexts and the strengths and challenges inherent in different approaches to practice. Chapters include Teaching science to the gifted in English state schools locating a compromised gifted talented policy within its systemic context. Models of education for science talented adolescents in the United States. Past present and likely future trends. Navigating the shifting terrain between policy and practice for gifted learners in Tanzania. Science education for female indigenous gifted students in the Mexican context. Gifted Science Education in the Context of Japanese Standardization. This book will appeal to scholars practitioners and policy makers who are in the field of gifted science education.
