History Alive Chapter 3origins Of The Cold War:

Cold War Workers Isabel Campbell, 2025-04-15 When Canada sought to protect its borders and aid its allies during the Cold War many people were recruited to build the emerging security state as construction and maintenance workers engineers members of the armed forces medical researchers and research subjects Security work transformed the lives of individuals families and communities in ways that were both predictable and surprising and both beneficial and harmful the militarization and colonization of Indigenous lives and lands was especially disruptive The opening essays of Cold War Workers intimately portray the complicated effects of Cold War labour upon Indigenous lives Elmer Sinclair a residential school survivor and member of the Canadian Armed Forces achieved equality with white men through his militarized masculinity His more positive professional experience contrasts with those of Indigenous workers on northern radar lines many of whom lost languages connections to the land and other elements of traditional cultures as they sought new skills and better employment Diverse Indigenous experiences of Cold War security work set the scene for the second set of essays which explore the impact of security preoccupations on marginalized groups the study of extreme isolation through scientific experimentation on human subjects the targeting of gay men with psychiatric labelling to enforce an idealized masculinity and the restriction of gender mobility in the Canadian military and the pushback from servicewomen Cold War Workers raises questions about the influence of settler colonial masculine institutional values on those who laboured for the Cold War state and society By comparing the experiences of different types of workers families and communities this volume reveals how race gender and privilege affected people in varied and sometimes unexpected ways The Struggle against Imperialism Edward H. Judge, John W. Langdon, 2018-06-15 This concise and engaging book argues that the Cold War and anti colonial movements should properly be studied and taught together not as distinct developments but rather as interwoven aspects of a complex global transformation The authors provide a cogent and concise description of the post World War II era and reveal connective dimensions of that era that remain hidden in books that focus primarily on either the Cold War or the struggles against imperial rule It not only deals with anti colonialism and Cold War together but also portrays the Cold War as a contest between anti imperialist empires capped by the collapse of one of them the multicultural trans regional Soviet realm in a work that is engaging and accessible to both students and general readers **Richard Ned Lebow: Key Texts in Political Psychology and International Relations Theory** Richard Ned Lebow, 2016-08-25 This third out of four volumes by Richard Ned Lebow in this book series includes texts on psychology and international relations causation counterfactual analysis The political psychology contributions draw on richer ancient Greek understandings of the psyche and offer novel insights into strategies of conflict management the role of emotions in international relations and the modern fixation on identity Forbidden Fruit Richard Ned Lebow, 2010-02-07 Could World War I have been averted if Franz Ferdinand and his wife hadn't been murdered by Serbian nationalists in 1914 What if Ronald Reagan had been killed

by Hinckley's bullet Would the Cold War have ended as it did In *Forbidden Fruit* Richard Ned Lebow develops protocols for conducting robust counterfactual thought experiments and uses them to probe the causes and contingency of transformative international developments like World War I and the end of the Cold War He uses experiments surveys and a short story to explore why policymakers historians and international relations scholars are so resistant to the contingency and indeterminism inherent in open ended nonlinear systems Most controversially Lebow argues that the difference between counterfactual and so called factual arguments is misleading as both can be evidence rich and logically persuasive A must read for social scientists *Forbidden Fruit* also examines the binary between fact and fiction and the use of counterfactuals in fictional works like Philip Roth's *The Plot Against America* to understand complex causation and its implications for who we are and what we think makes the social world work

Hungary's Cold War Csaba Békés, 2022-05-03 In this magisterial and pathbreaking work Csaba Békés shares decades of his research to provide a sweeping examination of Hungary's international relations with both the Soviet Bloc and the West from the end of World War II to the dissolution of the Soviet Union in 1991 Unlike many studies of the global Cold War that focus on East West relationships often from the vantage point of the West Békés grounds his work in the East drawing on little used non English sources As such he offers a new and sweeping Cold War narrative using Hungary as a case study demonstrating that the East Central European states have played a much more important role in shaping both the Soviet bloc's overall policy and the East West relationship than previously assumed Similarly he shows how the relationship between Moscow and its allies as well as among the bloc countries was much more complex than it appeared to most observers in the East and the West alike

The Anticolonial Front John Munro, 2017-09-21 This is a transnational history of the activist and intellectual network that connected the Black freedom struggle in the United States to liberation movements across the globe in the aftermath of World War II John Munro charts the emergence of an anticolonial front within the postwar Black liberation movement comprising organisations such as the National Association for the Advancement of Colored People the Council on African Affairs and the American Society for African Culture and leading figures such as W E B Du Bois Claudia Jones Alphaeus Hunton George Padmore Richard Wright Esther Cooper Jackson Jack O Dell and C L R James Drawing on a diverse array of personal papers organisational records novels newspapers and scholarly literatures the book follows the

fortunes of this political formation recasting the Cold War in light of decolonisation and racial capitalism and the postwar history of the United States in light of global developments

The History of College Affordability in the United States from Colonial Times to the Cold War Thomas Adam, 2020-10-13 This book examines how tuition and student loans became an accepted part of college costs in the first half of the twentieth century The author argues that college was largely free to nineteenth century college students since local and religious communities donors and the state agreed to pay the tuition bill with the expectation that the students would serve society upon graduation College education was essentially considered a public good This arrangement ended after 1900 The increasing secularization and professionalization of college education as well as changes in the socio economic composition of the student body which included more and more students from well off families caused educators college administrators and donors to argue that students pursued a college degree for their own advancement and therefore should be made to pay for it Students were expected to pay tuition themselves and to take out student loans in order to fund their education

How Race Is Made in America Natalia Molina, 2014 How Race Is Made in America examines Mexican Americans from 1924 when American law drastically reduced immigration into the United States to 1965 when many quotas were abolished to understand how broad themes of race and citizenship are constructed These years shaped the emergence of what Natalia Molina describes as an immigration regime which defined the racial categories that continue to influence perceptions in the United States about Mexican Americans race and ethnicity Molina demonstrates that despite the multiplicity of influences that help shape our concept of race common themes prevail Examining legal political social and cultural sources related to immigration she advances the theory that our understanding of race is socially constructed in relational ways that is in correspondence to other groups Molina introduces and explains her central theory racial scripts which highlights the ways in which the lives of racialized groups are linked across time and space and thereby affect one another How Race Is Made in America also shows that these racial scripts are easily adopted and adapted to apply to different racial groups
