School Mathematics Project,Scott, Foresman and Company,1996 **Advanced Algebra, Part 1** E. A. Maxwell,1943-01-02
The scope and treatment of Dr Maxwell s two volume course covering the transition from school to university is directed
towards training students in algebraic thinking so that processes do not become too mechanical The explanations are full the
difficulties of the beginner are foreseen and overcome Indeed the course should prove excellent for the lone student as well
as for the supervised class Topics in part one include polynomial theory equations inequalities partial fractions permutations
and combinations the binomial theorem and series and determinants The feel of the book may be illustrated by reference to
the treatment of partial fractions which is novel in several ways A theoretical exposition is given in some detail and varies
from standard treatments in leading to a method of calculation that arises directly from it The book contains many drill
examples which the author considers essential **Focus on Advanced Algebra** ,1998 Georgia K-12 Standards Success
