Solving Systems of Linear Inequalities

When a problem uses phrases like “greater than” or “no more than,” you can model the situation using a system of linear inequalities.

A **system of linear inequalities** is a set of two or more linear inequalities with the same variables. The solution to a system of inequalities is often an infinite set of points that can be represented graphically by shading.

When you graph multiple inequalities on the same graph, the region where the shadings overlap is the solution region.
