Riddle,1986-01-01 For 1 600 years Dioscorides ca AD 40 80 was regarded as the foremost authority on drugs He knew mild laxatives and strong purgatives analgesics for headaches antiseptics for wounds emetics to rid one of ingested poisons chemotherapy agents for cancer treatments and even oral contraceptives Why then have his works remained obscure in recent centuries Because of one small oversight Dioscorides himself thought it was self evident he failed to describe his method for organizing drugs by their affinities This omission led medical authorities to use his materials as a guide to pharmacy while overlooking Dioscorides most valuable contribution his empirically derived method for observing and classifying drugs by clinical testing Dioscorides De materia medica a five volume work was written in the first century Here revealed for the first time is the thesis that Dioscorides wrote more than a lengthy guide book He wrote a great work of science He had said that he discovered the natural order and would demonstrate it by his arrangement of drugs from plants minerals and animals Until John M Riddle s pathfinding study no one saw the genius of his system Botanists from the eighteenth century often attempted to find his unexplained method by identifying the sequences of his plants according to the Linnean system but while there are certain patterns there remained

inexplicable incoherencies However Dioscorides natural order as set down in De materia medica was determined by drug affinities as detected by his acute clinical ability to observe drug reactions in and on the body So remarkable was his ability to see relationships that in some cases he saw what we know to be common chemicals shared by plants of the same and related species and other natural product drugs from animal and mineral sources Western European and Islamic medicine considered Dioscorides the foremost authority on drugs just as Hippocrates is regarded as the Father of Medicine They saw him point the way but only described the end of his finger despite the fact that in the sixteenth century alone there were over one hundred books published on him If he had explained what he thought to be self evident then science especially chemistry and medicine would almost certainly have developed differently In this culmination of over twenty years of research Riddle employs modern science and anthropological studies innovatively and cautiously to demonstrate the substance to Dioscorides authority in medicine Works John Ruskin,1906 *Pesticides Documentation Bulletin* ,1968-07 Proceedings of the Linnean Society of London Linnean Society of London,1904 Includes list of additions to the library *Energy Efficiency Applications in Buildings* Bertug Ozarisoy,Hasim Altan,Young Ki Kim,Wei Shi,2025-06-30 Energy Efficiency Applications in Buildings presents an investigation into the energy use and measures to improve the energy efficiency of existing building stock in the UK The aim of this research is to assess the domestic energy use of statistically representative residential buildings and their occupants thermal comfort by considering the significant impact of overheating risks on energy consumption and occupants well being Divided into two volumes these books present energy consumption and thermal comfort in the construction sector as a complex socio technical problem that involves the analysis of an intrinsic interrelationship amongst dwellings occupants and the environment Using case studies the authors demonstrate the significance of improving energy efficiency and its impact on occupants during long term heatwaves in the summer Additionally the volumes demonstrate how dynamic thermal energy simulation can be used as a learning laboratory for future trends in housing energy consumption reduction Volume 1 Theories Methods and Tools presents the background to the research and the assessment methods and tools adopted by the research team Volume 2 Performance Evaluation and Retrofitting Strategies describes the case studies and building performance and post occupancy evaluations before making strategic policy and retrofitting recommendations The research and roadmap presented in these volumes can be used as a guidance tool for building energy modelling and performance simulation enabling architects building engineers and other practitioners to close the gap between the current understanding and the actual performance of existing building stocks International Forum on Information and Documentation ,1983 *Digest* ,1915 **Universal Worklist with SAP NetWeaver Portal** Darren Hague, This comprehensive technical guide shows developers technical consultants and solution architects all the ins and outs of the Universal Worklist in SAP NetWeaver Portal This hands on workshop takes you step by step from standard configuration to working with different user interfaces and covers workflow integration from any back
