Cost Studies of Buildings Allan Ashworth, Srinath Perera, 2015-07-16 This practical guide to cost studies of buildings has been updated and revised throughout for the 6th edition. New developments in RICS New Rules of Measurement NRM are incorporated throughout the book in addition to new material on e business, the internet, social media, building information modelling, sustainability, building resilience and carbon estimating. This trusted and easy to use guide to the cost management role focuses on the importance of costs of constructing projects during the different phases of the construction process. Features learning outcomes and self assessment questions for each chapter. Addresses the requirements of international readers. From introductory data on the construction industry and the history of construction economics to recommended methods for cost analysis and post contract cost control. **Cost Studies of Buildings** is an ideal companion for anyone learning about cost management.

It includes 20 000 prices for the most frequently specified construction items, the majority with labour constants and detailed build ups. All prices have been updated via comprehensive supplier engagement combined with AECOM's market intelligence and a short term inflationary forecast to ensure you have the most accurate cost data available. Activity descriptions and build ups have been updated to reflect changes to standard specifications. Building Regulation changes, emerging practices and changing outputs. Although it suits a wide range of project sizes, this is the only price book which sets out a detailed cost base for contracts exceeding 4 000 000 in value. All the standard features you have come to expect from SPON'S ARCHITECTS AND BUILDER'S PRICE BOOK are also included. Hundreds of alternative materials prices for the more unusual items. Detailed guidance on wage rates, daywork cost limits and allowances, property insurance and professional fees, plus useful formulae, design criteria and trade association addresses. Included within the inside front cover of every book is a VitalSource eBook redemption code giving one user access to the content digitally until the end of December 2025 **Spon's**

An Introduction to Building Procurement Systems Jack Masterman,2003-09-02 First Published in 2003 Building procurement

systems are the organizational structures needed to design and construct building projects The intention of this guide is to provide the construction professional with sufficient information about building procurement systems to ensure an awareness of the main methods that are currently available and their principal advantages and disadvantages Chapters 1 and 2 describe the concept and categorization of procurement systems and the evolution of the methods currently in use The next four chapters deal with each of the various categories and the individual systems themselves The needs of clients are examined in Chapter 7 in the context of project success Chapter 8 investigates the way in which clients decide which procurement method to use The author then identifies the principles governing the current choice and the various aids that are available to assist clients during this decision process Finally in Chapter 9 the author attempts to forecast the future of procurement systems and their use This clear well researched and well structured guide will be invaluable to students and practising construction professionals alike as they work with a range of building procurement systems to choose the system most suited to their needs
