Cisco Data Center Fundamentals Somjit Maloo,Iskren Nikolov,2022-09-29 Get ready to configure and operate modern data centers and move up to high value CCNP Data Center DC certification Cisco Data Center Fundamentals is the complete guide for network engineers and other professionals who need a solid understanding of modern data center technologies Especially useful for those preparing for the Cisco DCCOR exam and Cisco Certified Network Professional CCNP Data Center certification it fully addresses the essentials of networking storage compute and automation in today s data center environments Authored by two long time

experts in operating Cisco data centers and developing official Learning Cisco training for them this guide explains each concept step by step balancing depth and breadth and maximizing clarity throughout The authors go far beyond introducing relevant products protocols and features They illuminate underlying technologies identify key interdependencies walk through configuring working solutions and truly help prepare you to set up and operate a modern data center Gain a holistic unified understanding of the data center and its core components Walk through installation and deployment of key data center technologies Explore potential applications to see what's possible in your environment Learn how Cisco switches and software implement data center networking and virtualization Discover and apply data center network design and security best practices Review Cisco data center storage technologies and concepts including Fibre Channel VSANs storage virtualization and FCoE Explore the building blocks of the Cisco UCS data center compute solution and how UCS uses hardware abstraction and server virtualization Use automation and APIs to improve data center productivity and agility Create and customize scripts for rapid troubleshooting Understand cloud computing for the data center services deployment models and the Cisco Intersight hybrid cloud operations platform

Introduction to Modern Infrastructure Construction
George Wang, Don Chen, Jennifer Brandenburg, 2024-12-30 *Introduction to Modern Infrastructure Construction* serves as a pivotal resource for construction management education focusing primarily on heavy civil construction and the latest technological innovations in the field This essential textbook is designed for both academic and professional use thoroughly covering critical topics including earthwork highway planning design asphalt production paving recycling technology and transportation asset management Additionally it explores various aspects of infrastructure such as bridges railways airports and pipelines offering comprehensive insights beneficial to project management in these areas Each chapter is supplemented with discussion questions or assignments to enhance educational value and the text includes lab practice appendices to reinforce practical application Authored by leading experts in the field George Wang Jennifer Brandenburg and Don Chen *Introduction to Modern Infrastructure Construction* draws on their extensive experience in academic teaching research and practical application Their expertise provides readers with a unique blend of theoretical knowledge and real world perspective making this book an indispensable guide for anyone aspiring to excel in the field of infrastructure construction

Green Infrastructure in Chinese Cities Ali Cheshmehzangi, 2022-03-19 Since 2014 and the start of the New type Urbanization Plan NUP we see a turning point in the sustainability agenda of China One of the main indicators is greening cities and the built environments which will be covered holistically in this edited book From the perspective of green infrastructure in particular the book approaches key areas of forest city development sponge city program green roofing nature based solutions urban farming eco city development etc This is the first time that such important areas of research come together under the perspective of green Infrastructure The results would be beneficial to policymakers practitioners and researchers in China and across the globe The comprehensive set of findings from this book will benefit other countries

as we aim to highlight some of the best practices of the current age The main aim of the book is to put together an excellent group of scholars and practitioners from the field focusing on the topic of Green Infrastructure in Chinese Cities In doing so we aim to cover some of the key best practices for sustainable urbanism Divided into four parts the book covers four key areas of 1 Policy Interventions 2 Planning Innovation 3 Design Solutions and 4 Technical Integration In doing so we cover an array of best practices related to green infrastructures of various types and their impacts on cities and communities in China We expect the book to be a valuable resource for researchers in the areas of sustainability urbanism urban planning urban geography urban design geographical sciences environmental sciences landscape architecture and urban ecology The book covers essential factors such as policy regulations and programs in Part 1 planning paradigms and their impacts on urban development in Part 2 integrated design solutions that suggest sustainable urbanization progression in Part 3 and technical knowledge that would be utilized for the future development of green infrastructure practices in China and beyond Lastly this edited book aims to provide a collaborative opportunity for experts and researchers of the field who could contribute to the future pathways of sustainable urbanization of China Lessons extracted from these contributions could be utilized for other contexts which will benefit a wider group of stakeholders

Proceedings of the 2nd International Conference on Geotechnical Issues in Energy, Infrastructure and Disaster Management Amit Kumar Verma,T. N. Singh,Edy Tonnizam Mohamad,A. K. Mishra,Ranjith Pathegama Gamage,Ramesh Bhatawdekar,Stephen Wilkinson,2024-12-01 This book consists of selected papers presented at the 2nd International Conference on Geotechnical Issues in Energy Infrastructure and Disaster Management ICGEID 2024 held on January 19 20 2024 at IIT Patna India The papers represent the research work in the related fields of underground mining ground control mining geotechnics geo instrumentation mine tunneling and underground structures It focuses on the latest technology being implemented including artificial intelligence and machine learning applications to solve challenges in mining tunneling and geotechnical structure engineering It also highlights the state of the art technologies adopted by the civil and mining industry for their commercial as well as environmental benefits The papers are presented by an international pool of academics research scientists and industrial experts and therefore cater to the global audience from the field of underground engineering

Infrastructure Systems for Nuclear Energy Thomas T. C. Hsu,Chiun-lin Wu,Jui-Liang Lin,2014-02-03 Developing sufficient energy resources to replace coal oil and gas is a globally critical necessity Alternatives to fossil fuels such as wind solar or geothermal energies are desirable but the usable quantities are limited and each has inherent deterrents The only virtually unlimited energy source is nuclear energy where safety of infrastructure systems is the paramount concern Infrastructure Systems for Nuclear Energy addresses the analysis and design of infrastructures associated with nuclear energy It provides an overview of the current and future nuclear power industry and the infrastructure systems from the perspectives of regulators operators practicing engineers and research academics This book also provides details on investigations of containment structures nuclear waste storage facilities and the

applications of commercial academic computer software Specific environments that challenge the behavior of nuclear power plants infrastructure systems such as earthquake blast high temperature irradiation effects soil structure interaction effect etc are also discussed Key features Includes contributions from global experts representing academia and industry Provides an overview of the nuclear power industry and nuclear infrastructure systems Presents the state of the art as well as the future direction for nuclear civil infrastructure systems Infrastructure Systems for Nuclear Energy is a comprehensive up to date reference for researchers and practitioners working in this field and for graduate studies in civil and mechanical engineering

Fundamentals of Port Engineering Koos Schoonees, 2023-12-21 Port engineering primarily deals with the design construction operation management and maintenance of ports overlapping with many other disciplines This book provides an introductory text to prospective graduate port engineers and presents a wide variety of port subjects for practicing engineers It covers almost all topics related to port engineering in a fundamental way including dredging marine aids to navigation environmental issues containers liquid bulk dry bulk general cargo multipurpose roll on roll off Ro Ro fishing and ferry terminals Discussions are targeted at a conceptual design level Other features Aspects of port engineering are discussed including shipping maritime trade environmental aspects such as climate change resilience of ports nature based solutions and port management such as security equipment slurry pumping and so forth Illustrates the design of port terminals Discusses site selection for a new port the factors to be considered and ways to compare different potential port sites Explores asset management and repair of marine structures Includes case studies from around the world examples and practical and user friendly guidelines
