Planning, Housing and Infrastructure for Smart Villages Hemanta Doloi, Ray Green, Sally Donovan, 2018-12-07 Some 7 3 billion people currently live on the planet Of these 3 4 billion live in rural areas In just a few regions Latin America the Middle East and North Africa less than 50 per cent of poverty is now located in rural areas But for the rest of the world s regions between 55 per cent and 80 per cent of the poor continue to live in the countryside Progress is being made but much of the knowhow needed is not disseminated outside of a small coterie of professionals who work in the area With urban development attracting a great deal of attention lately poorer rural areas deserve the same and new knowledge for empowerment of rural communities is urgently needed This book provides an overview of current thinking and practices that have emerged over the last thirty years for uplifting rural communities in developing economies Drawing on a body of knowledge across a spectrum of relevant disciplines this book provides a range of innovative ideas for rural planning housing and infrastructure development Governments in many emerging economies where rural poverty is often most acute have attempted to improve livelihoods Approaches and techniques that have been used for urban development are often not applicable to rural communities Studies show that money allocated for rural development is often not effectively spent due to distance lack of infrastructure lack of education poverty and other factors Meanwhile the gap in development between the

city and country continues to grow sometimes leading to social and political instability in both developing and developed countries This book seeks to provide a guidebook for meeting such challenges Through in depth enquiry of global practices and thinking about rural development and selected case studies the authors argue that careful consideration must be given to incorporating issues of resilience resourcefulness and the involvement of communities at grassroots levels in realising the transformation of rural settlements into Smart Villages

Wegwijzer voor methoden bij enterprise-architectuur - 2de herziene druk Bas van Gils, Erwin Oord, Marijn Driel, 2017-01-01 For trainers free additional material of this book is available This can be found under the Training Material tab Log in with your trainer account to access the material Voor trainers is er gratis extra materiaal bij dit boek beschikbaar Dit is te vinden onder het tabblad Training Material Log in met uw trainersaccount om het materiaal te raadplegen Enterprise architectuur wint steeds meer aan belang Het is niet alleen de toenemende complexiteit in IT en de alsmaar groeiende behoefte aan informatie maar ook de complexere manieren van zaken doen die organisaties noopt om op

samenhang te sturen In steeds meer organisaties zijn dan ook architecten werkzaam niet alleen in de IT maar ook in de business Langzamerhand wordt het vakgebied enterprise architectuur volwassen En van de verschijnselen is het ontstaan van aanpakken methoden en talen om enterprise architectuur te classificeren te beschrijven en te implementeren De praktijk wijst uit dat het niet gemakkelijk is om de meest geschikte aanpak of methode te kiezen Aanpakken en methoden zijn niet vergelijkbaar en eerder complementair dan elkaar uitsluitend Het lijkt alsof je appels en peren vergelijkt Daarnaast is iedere organisatie weer anders en hangt het van de manier en volwassenheid van het bedrijven van enterprise architectuur af welke methode daar het beste bij past Dit alles maakt het kiezen van de enterprise architectuurmethode voor een organisatie tot een hachelijke aangelegenheid

Information, Organisation and Technology Kecheng Liu, Rodney J. Clarke, Peter Bøgh Andersen, Ronald K. Stamper, 2012-12-06 Organisational semiotics is a discipline that is concerned with the interrelationships between individuals and groups and between humans and technology functioning in organisations and society Organisational semiotics opens up the prospect of theory building and the development of new methods and techniques to gain insights into organised behaviour and enacted social practices in the presence and absence of various technologies It shares common interests with many other approaches to information and organisations such as computer science computational semiotics organisational engineering and language action perspective The common vision shared by these approaches is to treat organisations and related information systems and technologies within a unified semiotic framework with particular reference to the huge range of issues that elude many traditional disciplines The analysis and design of information systems develops methods for solving the practical problems but offers no

rigorous theoretical foundation for them or how information functions within and between organisations The semiotic perspective accommodates the individual and the social the human and the technical intra and inter organisational interactions at a level of detail that is required in the study modelling design and engineering of new and alternative organisational and technical systems This perspective is outlined in the chapter presentations of Information Organisation and Technology
