Beginning Database-Driven Application Development in Java EE Yuli Vasiliev, 2009-04-21 Beginning Database Driven Application Development in Java™ EE Using GlassFish™ focuses on the open source GlassFish persistence engine. This book shows Java programmers how to develop applications utilizing relational database technologies with examples using Oracle and MySQL and the GlassFish application development framework and deployment platform all based on Java EE. The book explains in detail how you can organize your Java EE solution into a multilayer architecture placing most emphasis on how to implement the persistence and database tiers of an application. Through many examples this book shows how you can efficiently use the Java Persistence features available in the Java EE platform. Find out how you can greatly simplify the task of building the persistence layer of your Java EE application by moving some application logic into the underlying database utilizing database views stored programs and triggers. The book also explains how to deploy Java EE applications to GlassFish a free open source Java EE 5 compliant application server.

JavaScript: The Missing Manual David Sawyer McFarland, 2008-07-21 JavaScript is an essential language for creating modern interactive websites but its complex rules challenge even the most experienced web designers. With JavaScript: The Missing Manual you'll quickly learn how to use JavaScript in sophisticated ways without pain or frustration even if you have little or no programming experience. JavaScript expert David McFarland first teaches you the basics by having you build a simple program. Then you'll learn how to work with jQuery a popular library of pre-built JavaScript components that's free and easy to use. With jQuery you can quickly build modern interactive web pages without having to script everything from scratch. Learn how to add scripts to a web page store and manipulate information communicate with the browser window respond to events like mouse clicks and form submissions and identify and modify HTML. Get real world examples of JavaScript in action. Learn to build pop up navigation bars enhance HTML tables create an interactive photo gallery and make web forms more usable. Create interesting user interfaces with tabbed panels accordion panels and pop up dialog boxes. Learn to avoid the ten most common errors new programmers make and how to find and fix bugs. Use JavaScript with Ajax to communicate with a server so that your web pages can receive information without having to reload.
