Matlab Reg And Design Recipes For Earth Sciences:

MATLAB® and Design Recipes for Earth Sciences Martin H. Trauth, Elisabeth Sillmann, 2012-09-14 The overall aim of the book is to introduce students to the typical course followed by a data analysis project in earth sciences A project usually involves searching relevant literature reviewing and ranking published books and journal articles extracting relevant information from the literature in the form of text data or graphs searching and processing the relevant original data using MATLAB and compiling and presenting the results as posters abstracts and oral presentations using graphics design software The text of this book includes numerous examples on the use of internet resources on the visualization of data with MATLAB and on preparing scientific presentations As with its sister book *MATLAB Recipes for Earth Sciences* 3rd Edition 2010 which demonstrates the use of statistical and numerical methods on earth science data this book uses state of the art software packages including MATLAB and the Adobe Creative Suite to process and present geoscientific information collected during the course of an earth science project The book's supplementary electronic material available online through the publisher's website includes color versions of all figures recipes with all the MATLAB commands featured in the book the example data exported MATLAB graphics and screenshots of the most important steps involved in processing the graphics

MATLAB® Recipes for Earth Sciences Martin H. Trauth, 2020-12-02 MATLAB is used in a wide range of geoscientific applications e.g. for image processing in remote sensing for creating and processing digital elevation models and for analyzing time series This book introduces readers to MATLAB based data analysis methods used in the geosciences including basic statistics for univariate bivariate and multivariate datasets time series analysis signal processing the analysis of spatial and directional data and image analysis The revised and updated Fifth Edition includes seven new sections and the majority of the chapters have been rewritten and significantly expanded New sections include error analysis the problem of classical linear regression of log transformed data aligning stratigraphic sequences the Normalized Difference Vegetation Index Aitchison's log ratio transformation graphical representation of spherical data and statistics of spherical data The book also includes numerous examples demonstrating how MATLAB can be used on datasets from the earth sciences The supplementary electronic material available online through SpringerLink contains recipes that include all the MATLAB commands featured in the book and the sample data

MATLAB® Recipes for Earth Sciences Martin Trauth, 2010-06-26 MATLAB is used for a wide range of applications in geosciences such as image processing in remote sensing the generation and processing of digital elevation models and the analysis of time series This book introduces methods of data analysis in geosciences using MATLAB such as basic statistics for univariate bivariate and multivariate datasets jackknife and bootstrap resampling schemes processing of digital elevation models gridding and contouring geostatistics and kriging processing and georeferencing of satellite images digitizing from the screen linear and nonlinear time series analysis and the application of linear time invariant and adaptive filters The revised and updated Third Edition includes ten new sections and has greatly

expanded on most chapters from the previous edition including a step by step discussion of all methods before demonstrating the methods with MATLAB functions New sections include Data Storage and Handling Data Structures and Classes of Objects Generating M Files to Regenerate Graphs Publishing M Files Distribution Fitting Nonlinear and Weighted Regression Color Intensity Transects of Varved Sediments and Grain Size Analysis from Microscope Images The text includes numerous examples demonstrating how MATLAB can be used on data sets from earth sciences All MATLAB recipes can be easily modified in order to analyse the reader s own data sets

GPS Stochastic Modelling Xiaoguang Luo, 2013-07-06 Global Navigation Satellite Systems GNSS such as GPS have become an efficient reliable and standard tool for a wide range of applications However when processing GNSS data the stochastic model characterising the precision of observations and the correlations between them is usually simplified and incomplete leading to overly optimistic accuracy estimates This work extends the stochastic model using signal to noise ratio SNR measurements and time series analysis of observation residuals The proposed SNR based observation weighting model significantly improves the results of GPS data analysis while the temporal correlation of GPS observation noise can be efficiently described by means of autoregressive moving average ARMA processes Furthermore this work includes an up to date overview of the GNSS error effects and a comprehensive description of various mathematical methods
