Robinson,2007

Samuel Ibn Tibbon c 1165 1232 the eminent translator philosopher and exegete is most famous for his Hebrew translation of Maimonides *Guide of the Perplexed* However he wrote original works as well and laid the foundations for a distinctive philosophical exegetical movement what is today called Maimonideanism James T Robinson's book includes a first English translation of Ibn Tibbon's commentary on Ecclesiastes which was the foundational work of the Maimonidean tradition The translation with full annotation is accompanied by an introduction which provides relevant historical philosophical and

exegetical background explains difficult passages and identifies Ibn Tibbon's important contributions to the emergence of Maimonideanism. The author analyzes Ibn Tibbon's sources and influences in Jewish philosophy and exegesis and in Graeco-Arabic philosophy especially al-Farabi and Averroes. He discusses his theory and method of exegesis and explains the main arguments and allegories of the work which relate to the problem of human perfection. Responding to and developing the various positions of his time especially the infamous view of al-Farabi that immortality of the soul is nothing but an old wife's tale, Ibn Tibbon argues that conjunction with the active intellect is possible but rare: only one man in a thousand can attain it. Thus while the elite few should pursue it through a life of study and contemplation, the many should focus on perfection in this world: they should eat, drink, and show the soul good.
