Argument Dialectics: The Place of Reasons in Logic Hubert Marraud, 2025-06-12 This book is a systematic exposition of Argument Dialectics AD Despite its name argument dialectics is a logical approach to argumentation theory AD stands out among theories of argument because of three unusual features it is reasons based holistic and particularistic This implies that AD conceives of logic as a theory of the dialectical construction of reasons not as a theory of inferences Consequently contrary to other logical approaches AD focuses on the study of inter argumentative relations especially those of opposition and weighing The book makes an extensive use of the theory of reasons a branch of metaethics that has been a very valuable quarry of intuitions and concepts for the elaboration of a reason based theory of argument The oppositions generalism particularism and atomism holism proposed by Jonathan Dancy which play a central role in the book and in the development of AD have been adapted from the theory of reasons and the same can be said of the distinction between different statuses of reasons that AD associates with different kinds of counterarguments Conceiving of the theory of argument in terms of reasons has the effect of situating the paradigm of argumentation in practical argumentation reasoning about what to do

rather than in theoretical argumentation about what to believe as inference based theories do Hence this book is of interest to argumentation theorists communication theorists epistemologists linguists moral philosophers and philosophers of law

Elizabeth Weiser, 2017-09-25 In today s diverse societies museums are the primary institutions within the public sphere in which individuals can both engage critical thought and celebrate community This volume uses the lens of rhetoric to explore the role these societal repositories play in establishing and altering cultural heritage and national identity Based on fieldwork conducted in over sixty museums in twenty two countries across six continents Museum Rhetoric explores how heritage museum exhibits persuade visitors to unite their own sense of identity with that of the broader civic society and how the latter changes in response Elizabeth Weiser examines what compels communities organizations and nations to create museum spaces and how

museums operate as sites of both civic engagement and rhetorical persuasion Moving beyond rhetorical explorations of museums as memory sites she shows how they intentionally straddle the divides between style and content intellect and affect and unity and diversity and why their portrayal of the past matters to civic life and particularly studies of nationalism in the present and future Deeply researched and artfully argued *Museum Rhetoric* sheds light on the public impact of cultural and aesthetic heritage and opens avenues of inquiry for scholars of museum studies and public history
